Six Republicans Back Move

House Panel Votes to Release Impeachment-Probe Evidence

By Richard L. Lyons

WASHINGTON, June 25 (WP). The House Judiciary Committee voted 22 to 16 today to release during the next couple of weeks most of more than 7,000 pages of evidence presented by its staff whether President Nixon thould or should not be impeach-

In general, the President's seerest critics voted to release the naterial and his staunchest lelenders voted against. But it mobably should not be consider-

d a test vote on impeachment. Two Democratic critics voted gainst for fear of hurting third serties. At least two strong sup-serters of the President voted to clease the material Sixteen Democrats were joined by six tenublicans in the majority. The White House had called or release of the evidence and mening of the committee's hear-

The only documents specifically seld-back by the resolution were histified ones on the bombing The resolution also empowered the chairman, Rep. Peter Rodino jr, D.N.J., and Rep. Edward Ruschinson, R.Mich., to delete other unspecified material if they

Members generally interpreted this as power to delete offensive personal characterizations but not matters of substance relevant to the question of whether the President should be impeached and removed from office.

Rep. Rodino told newsmen he did not know how rapidly the material could be printed and released, but he said he wanted it all made public before the committee begins debating and voting on articles of impeachment on July 15.

The material will include the committee's transcripts of 13 hours of taped presidential conversations, most of them dealing with the Watergate cover-up. This would show discrepancies, many of which have already been published between the committee's transcripts and those made public by the President. also include material

resident Nixon arrived here Conight, en route to Moscow, with White House officials halling his Middle East and Soviet trips as widence that Watergate has not apped his administration's poency in world diplomacy. Mr. ... Vixon will be in Russia for eight -lays after a two-day visit in

The President and his official arty received a formal welcome from the Belgians King Baudown and Queen Fabiola in a nato meeting which will be a display of Western unity before the Moscow summit. Europeans are calling the allied gathering or NATO governmen

showniece summit." Aboard the Nixon plane on the flight across the Atlantic, a senior White House official whose identity is withheld under the briefing rules, sought to dispel any impression that the administration will be hampered in Moseow negotiations on nuclear arms by the clash in Washington yestreday about an alleged "loophole" in the U.S.-Soviet unclear accord at the 1972

Moscow summit. Secretary of State Henry Kissnger who is traveling with the resident, yesterday disputed the contention of Sen. Henry M. lackson, D-Wash, that there was loophole in the ceiling on Soviet

nissiles on submarines. The White House official on fr. Nixon's plane acknowledged hat what he described as a farifying agreement was initiald last week between the United tates and the Soviet Union ... Aber sources said the initialing ook place Jan, 18 in Moscow. Sen Jackson said yesterday

BRUSSELS, June 25 (WP) - about the incident was "withholding . . . a secret agreement" from the Congress and the American

> The senator's remarks carried the implication that any agreements emerging from the new Moscow summit will be subject to intense scrutiny, along with Mr. Kissinger's interpretation of them. This marks the most open challenge so far to Mr. Klasinger's candor and his unusually high prestige in Congress, at a time controversy has heightened skepticism in Congress. The White House official aboard

> the President's plane said that although Watergate represents ity of the U.S. government, "we turned around the whole Middle East in the middle of Watergate. It is to the interest of the President's successors in 1977 that they inherit this kind of [activist] foreign policy." He said the Russians realize that if the process of relaxation of tensions is arrested it will be hard to revive.

"If we did not go to the sum-mit," he said, "we would be saying we are not a functioning government." He said at another point, speaking of the President, that "history would never forgive him" if he failed to pursue all avenues of detente diplomacy. Mr. Kissinger previously has expressed this view publicly.

Mr. Nixon is still suffering from a mild attack of phlebitis, an inflammation of the veins, in his left leg, but he is in "no danger" of a blood clot, his per-sonal physician said today.

"I'm feeling good, I'm feeling fine," the White House press secretary, Ronald Ziegler, quoted Mr. Nixon as saying. The ailment was disclosed resterday.

United Press International,

RRIVAL—President and Mrs. Nixon are greeted by King audonin of the Belgians as they disembark at Brussels. sional committees, federal agencies and the Watergate grand jury dealing with Watergate, the dairy campaign contribution and ITI matters, domestic surveillance, such as wirefaps on government officials and the Ellsberg case alleged misuse of the Internal Revenue Service and other federal agencies to punish political viemies, political dirty tricks and

the President's personal finances.

Rep. Don Edwards, D-Calif., a Nixon critic, opposed release of the material on civil libertarian grounds. He said that it is filled with rumor and gossip" and that its release is "unfair to the President and to various third parties caught in the web of Watergate." He proposed that the committee decide on whether to recommend impeachment and then release only the evidence on which it based its decision.

Bep. Barbara Jordan, D-Texas a liberal who joined Rep. Edwards in opposition, called it irresponsible to publish the material without first drawing conchisions. "The public wants answers." she said. The com-mittee should say: 'Here is our answer and here is the evidence

to support it." But Rep. Wayne Owens, D-Utah, author of the resolution, said the public had a right to know the basis of a committee decision and should have the evidence before it when the committee begins its public debate next month.

One argument against releasing the material is that it could prejudice the rights of detendants to fair treatment in the Elisberg break-in trial beginning Wednesday and the Watergate conspiracy trial starting in Sep-tember. Rep. Owens said the Elisberg jury would be selected and sequestered before the mate-

rial is released a. Rep. Robert Succiory, R-III., Said that if the committee voted when the Watergate-impeachment for impeachment on a Watergate allegation it would have to release relevant evidence before September anyway. The sooner it is released, the less damage would be done, he said.

sion to release the material in closed session because it was discussing material considered confidential until released.

House Data Barred

The committee also decided by a party-line 21-to-17 vote not to issue a subpoena to obtain from the clerk of the House records of dairy contributions to House members before April 7, 1972, when the public-reporting law for (Continued no Page 2, Col. 7)

'Slave Labor' Censure Of Soviet Fails in ILO

GENEVA. June 25 (AP) .- A proposal to blacklist the Soviet Union as a violator of a convention abolishing slave labor was rejected today by delegates to an International Labor Organization conference.

The vote on a committee recommendation to censure the Sovict Union failed to draw a quorum after a six-hour debate, and the committee report was thrown out. The role was 123-0 for adoption. 83 short of a quorum, and the 156 abstentions in the voting included the Soviet bloc and many countries of the Third World. The proposal had drawn angry

rehuttal from Soviet delegate Semyon Ivanov, who told the conference that the charges were designed to renew the cold war. A conference committee voted 3-1 a week ago to cite the Soviet

Union for failing to respect the 44-year-old convention. It was the first time in the ILO's 55-year history that a major power has been proposed for the "special

Twenty-three nations were proposed for the list along with the Soviet Union this year, Most are in Africa and Asia but they also include Chile and Greece.

Mr. Ivanov said the committee decision distorted reports submitted by his government and added that Soviet laws requiring compulsory work for "parasitical" elements could not be likened to forced labor.

Work is becoming an increasingly natural need for human beings," he declared. "The fight against idlers is a fight against crime."

He said the committee had been "used for statements which want to bring us back to the period of

cold war." The Soviet speaker was chal-

lenged by a U.S. delegate for de-She referred to the death of 13 scribing the committee report as civilians shot by British troops "ludicrous, laughable and completely lacking in objectivity." two years ago and the death of Mrs. Bobbye Spears of the U.S. Department of Labor said the ghan in Parkhurst Prison Isle conference now had to decide wbether "we apply a standard to the weak and the small that is different from that which we ap-(Continued on Page 2, Col. 5) ply to the high and the mighty.

"How this body answers that questico carries implications for the future of this organization, the importance of which cannot be overemphasized."

A Nigerian, Simeon Koku, said that by legal standards it was relear that the Soviet Union was violating the convention." said the Nigeriao delegation would obstain in a vote, however, becouse it had "reservations about the report as a whole."

The committee vote of ceusure stemmed from a report by an in-ternational jurists' group that objected to a 1961 Soviet law requiring compulsory labor for persons "evading socially useful work and leading an anti-social para-sitic way of life."

The experts sald this was incompatible with the 1930 conventico, which was ratified by the Soviet Union in 1956. The Soviet law has been criticized before at ILO meetings, but this was the first time a committee had recommended censure.

Russians Orbit Unmanned Lab. Men May Follow

MOSCOW, June 35 (UPI).-The Soviet Union today specessfully launched an unmanned Salyut space laboratory for what could be a manned space link-up coinciding with the visits of

the launch did not mention the possibility of a cosmonaut craft's linkup with Salyut-3. But Westcrn space experts said that if all goes well the Russians will probably soon launch one or more manned Soyuz spacecraft to dock with the orbiting laboratory.

There was speculation that a manned launch would be made during the weeklong visit by President Nixon beginning Thurs-

4 Arab Raiders Die After Killing 4 in Israel Town

NAHARIYA, Israel. June 25.-Four Arab terrorists killed four Israelis and were slain themselves in a raid early today on this Mediterranean resort town. The raid touched off Israeli warnings that the Palestinians might scuttle U.S. peace moves in the

A senior Israeli cabinet minister said Jerusalem was beginning to doubt the sincerity of Egypt's desire for peace, because of the backing it was giving the guerrillas. Premier Yitzhak Rabin said

Israel held Lebanon responsible for the Nahariya attack, because the terrorists were based in Lebanco. In Lebanon, newsmen reported

that Israeli heavy artillery had sbelled villages near the border, possibly in retaliation, but an Israeli aide denied that shelling had begun, Previous Israeli reprisals for terrorism have included air attacks on border villages and Palestinian refugee camps in Lebanon.

Mr. Rabin, addressing the Knesset (parliament) in Jerusalem said he was certain that Lebanon had the power to prevent guer-

'Responsibility and Power' "But, to my regret, there are still no signs that the Lebanese government is acting in a sys-tematic and effective way in this direction in conformity with its

responsibility and power," Mr. Rabin added Mr. Rabin gave no hint that Israel would stage reprisal raids. on Lebanon. But he indicated. that Israel had no intention of dropping its war against the ter-

rorists. Visiting Nahariya earlier in the day, he declared: "We will not tolerate these attacks. We will do everything possible to prevent them and punish

those responsible." He refused to say if Israel would retalizte, but said: "Terrorism is a continuous activity and requires continuous response."

Arrival by Boat

In the guerrilla raid on Nebamya, the attackers cruized down the coast seven miles from the Lecanese border in a dinghy, paddled ashore and struck shortly after midnight, the Israeli military command said.

Civilian volunteer guards spotted the guerrillas and fired on them, but the Arabs dashed into a huilding and forced their way into the apartment of Mordechai Zarankin. The guerrillas killed his wife. Irka. 29, their daughter Ronit, 10, and their son Gilead, 5, as the family tried to escape by jumping off a balcony. Mr. Zarankin was seriously wounded. One Israeli soldier was killed storming the building.

The gunmen ignored the pleas of soldiers to announce their demands and release any hostages. Sharpshcoters picked off a guerrilla sentinel posted on the roof (Continued nn Page 2, Col. 3)

4 Austrians In UN Force Die in Golan

Mine Blasts Vehicle; Ali Israeli Troops Out

From Wire Dispatches KUNEITRA, Syria, June 25.— Four Austrian soldiers in the UN Disengagement Observation Force were killed today when their vehicle struck a mine on the road leading to the peak of Mount Hermon, the Israeli military command said.

The accident occurred as the Israelis completed their withorawal from Golan Heights territory captured from Syria last

It was unclear whether the mine had been planted by the Syrians or the Israelis.

The Israell spokesmen said the four and a fifth soldier, who was wounded slightly, were traveling along a road in Syrian territory when their vehicle hit the mine. The incident happened a few minutes before the Israelis completed evacuating their positions at the peak of the Mount Hermon range, he said.

A UN spokesman in Jerusalem said the bedies were transferred to Damascus for buriel arrangements.

The dead soldiers were identified as Cpl. Hans Hofer, 20, Pfc. Walter Neuheuser, 27, Cpl. Helmut Storm, 21, and Prt. Alija Voloder, 20.

tified as Cpl. Josef Schrattenecker, 18.

They were the first casualties of the UN observer force set up in the troop - disengagement agreement worked out this spring to end 2 1/2 months of fighting on the Golan Heights.

The UN spokesman said the road had been checked in the last two days by UN personnel and had been declared safe. He said, however, that this area and areas on and north of Mount Hermon "are still covered with large numbers of mines."

over Kuneitra late today. The ruins had been held by Israel since the 1967 Arab-Israeli war. and they were handed over to the UN force yesterdey along (Continued en Page 2, Col. 5)

Congressman Seeks to Plow Funds Into Backyard Gardens

By William Greider

WASHINGTON, June 25 (WP).-Rep. James Burke, D-Mass., is cultivating an ulea that he thinks is as ripe as sweet corn in August,

All these years, Rep. Burke figures, tural congressmen have been legislating big federal handouts for their farmers back home. So why can't a city guy take care of his folks? With a little agricultural subsidy for the backyard gardeners of America. "These hobby farmers and

these big corporate farmers get all these tremendous tax breaks," said Rep. Burke, 64, the secondranking Democrat on the House Ways and Means Committee. "There wouldn't be any harm m giving the home gardeners e little nibble at the cake."

He talks grandly of germinating a "back-to-the-soil movement" that would eclipse the Victory Gardens of World Wats I and II, drive down food prices

and feed the nation in times of shortage.
"It would also give the American family a chance to find out

what a real tomato tastes like." said the congressman, who represents close-in suburbs of Boston. For starters, Rep. Burke has asked the House Agriculture Committee to enact a bill dis-

tributing free vegetable seeds to

home gardeners, three packets to a family. Then he persuaded Richard Bolling, D-Mo. his colleagues on the Ways and Means Committee to approve tentatively a 7 percent investment tax credit for backyard garden equipment. "The home and family garden tax credit amendment," as he styled it, would let gardeners

subtract up to \$7 on their income-tax hills if they spend up to \$100 on boes, rakes, wheelbarrows, spades, pitchforks and such, "White potatocs-\$4.65 a

peck: lettuce-85 cents a head; onions-69 cents a pound," Rep. Burke wailed. "Take a look at the people in the supermarket. It's bad enough, the look of despair when they go along the meat counter, but then they go to the vegetable counter and all they hit is these high prices." Rep. Burke has been talking up the idea among the serious gardeners in the House of Representatives, tillers of the soil like Wayne Hays, D-Ohio, Silvio Conte, R-Mass., and

"I told Jim I think it's a helluva idea," said Rep. Frank Annunzio, D-III., a producer of peppers, corn and tomatoes in the 39th Ward of Chicago, "We got to go back to garden farming to get the prices down. If people will think they're doing something patriotic, it will go."

Rep. Hays, who gardens a sixth of an acre on his farm near Belmoot, Ohio, will go along with the tax credit but he's skeptical about free seeds. got planted." Rep. Burke, who remembers

with considerable nostalgia the

Victory Garden produce he raised as a boy, no longer gardens himself. He calculates that \$6 million in free seeds from the government would yield \$380 million in homegrown produce at retail prices. Rep. Hays, who does garden, knows that sometimes it doesn't work out so neatly.

"The year before last," Rep. Hays recalled, "I supplied half of the Hill with cucumbers. I must have had 25 or 30 bushels. Last year, my cucumbers got blight. I don't guess I had a bushel of cucumbers."

Rep. Hays gardens on weekends-tomatoes, peas, beans, corn and so on-but this is an election year, which means he can't keep up with the weeds the way he ought. Personally, "The government used to do he has been more upset by the that," he said. "I got my rising price of flowers than he has been more upset by the

doubts about how many of them inflation at the vegetable counter.

"I usually put in geraniums around the house when the tulips are finished," Rep. Hays said. "This year, went out of sight. I planted marigolds instead."

Rep. Conte, from Pittsfield Mass., gardens at his home m Washington - onions, three kinds of lettuce, squash, chicory herbs, and four dozen tomato plants.

"I planted the garden briginally when I was fighting the hig-time corporate farmers on subsidies," Rep. Conte said. "I called it my protest patch."

Over the years, Rep. Conte and allies have won most of what they were seeking in limits on cash subsidies to large cotton and sugar growers. But he kept his garden for non-

political recreation. Rep. Conte likes Rep. Burke's backyard subsidy. "It's not giving anybody something not (Continued on Page 3, Col. 5)

Wants to Know What Others Give

EEC Sets Condition for Paying Share of UN Aid in Oil Crisis

(UPI).-Foreign ministers of the European Economic Community agreed today to help finance a UN fund to assist developing countries that suffered most from the sharp increase in oil prices -but only if other nations help

The EEC Council of Ministers had already agreed in principle on the matter at an earlier meeting. The main question at today's session was whether the Common Market's letter to UN Secretary-General Kurt Waldheim should mention the amount that the market was willing to contribute and make it conditional on contributions from other countries.

The EEC's Executive Commission had proposed that the market contribute \$500 million to the \$3-billion fund. The oilproducing countries were expected to contribute \$1.5 billion and other industrialized countries \$1 billion, but no firm commitments

have been made.
The ministers finally agreed that the EEC would send Mr. Waldheim a letter saying it was willing to contribute to the fund. but not alone. The commission will find out how much other countries are willing to con-tribute and on what conditions,

Ethiopia Curbs Travels Abroad

ADDIS ABABA, Ethiopia June 25 (Reuters) -- Ministers, government officials and thousands of other Ethiopians were today barred from traveling abroad pending investigations by a new anti-

corruption commission. The ban affects all civil servants, other state employees, inembers of the judiciary and parliament, whether past or

A government proclamation, signed by Premier Endalkatchew Makonnen, set up a commission of inquiry to check possible corruption and mismanagement. The proclamation, effective, June 15, appeared today.

LUXEMBOURG, June 25 and determine how much the EEC would be able to take from Its 1974 budget to this end.

The council also came close to agreement on tariff advantages terraneau countries.

The ministers gave the broad outlines of tariff concessions on the important fruit exports to Western Europe by the Maghreb countries—Algeria, Tunisia and Morocco—and also by Spain and

The Machreb nations and Malta would qualify for aid loans worth \$420 million over five years. The ministers ordered the permanent representatives of the nine Common Market countries at EEC headquarters in Brussels to work

out the final details.

The unexpected progress in Luxembourg followed a warning earlier in the day from the three Maghreb ambassadors to the EEC that their countries were becoming restive at the ministers' slow pace. The envoys said the continued delay could jeopardize th. EEC's hopes of a closer en-tente, covering scientific technical, economic and agricultural cooperation and oil questions, with the entire Arab world.

The major difficulties for the EEC were created by Britain, which currently has no tariffe on imports of many fruits from the region. The common external tariffs imposed by the six original EEC states range from 7 to 24

The EEC ministers now have partial agreement as a basis for negotiating with the Mediterranean nations on the reduction of many of these tariffs,

The British are insistent on driving the tariffs down as low as possible in order to minimize the rise in consumer prices which will follow the imposition

of tariffs in Britain. In the context of the renegotiation of the United Kingdom's membership of the Common Market, Foreign Secretary James Callaghan said that as a result of British pressure, the Community had made a useful step toward increasing outside access to

Brezhnev's Stock at Peak

MOSCOW, June 25 (NYT).— In the big record store on Kalinin Prospekt, young people crowded around the counter, buying up a shipment of inexpensive recordings of Western rock. On another shelf stood an unnoticed album of two records at the bargain price of 50 kopecks-65 cents.

It was a special new item-Leonid Brezhnev's address on April 23 to the All-Union Leninist Communist Alliance of Youth, the first recorded speech of a living Soviet leader offered for mass sale since the time of Stalin.

It was displayed against 2 backdrop of albums of speeches by Lenin, the most hallowed figure in Soviet history.

eles drove through the town of The records, which appeared just a few days ago after some advance press publicity, are but one symbol of the current prestige of Mr. Brezhnev. The gregarious Bule, sitting arm in arm with rebel soldiers, and were cheered When a Portuguese colonel 67-year-old Communist party leader, who is going this week into his third meeting with Presicame upon a guerrilla camp in the bush unexpectedly, he was received with military honors and returned to his headquarters dent Nixon, is riding the crest of wearing the insignia of the rebel a boom-his standing recently recommander, which be had exinforced by Soviet elections, his image refurbished and his policies largely endorsed by his Polithuro Three weeks ago, a soldier in a troop-carrying helicopter was

The Soviet economy, by recent standards, is having a pretty good year, allowing the Soviet leader to cast himself as the champion of both prosperity and peace in his election address. One indication of his self-con-

fident mood these days was his ouip on election day—when Soviet citizens approved the single slate of candidates for the Soviet Union's nominal legislature—that a voting registrar should "please accept my eyebrows as identifica-tion," a gibe at his bushy crebrows, which are the target of Moscow jokes. To refer to Mr. Brezhnev, people will simply call him "brows" or flick a finger

across their eyebrows. This kind of jocular behavior is a side of his personality that his own people rarely glimpse. Here at home, he is the restrained master of the Kremlin.

It has been almost a decade since the coalltion headed by Mr. Brezhnev overthrew Nikita Khrusbcbev. During this time, he has accumulated power fairly steadily, packing the governing 16-man Politburo with half a dozen of his own men, and ousting two opponents in the last three years. He has been a shrewd enough

politician to balance his periods in the limelight with brief phases of sharing center stage with others in the ruling group, especially Premier Alexei Kosygin and President Nikolai Podgorny. While Mr. Nixon has been parrying the press and dueling with: Congress through his lawyers,

Mr. Brezhnev has been the object of the kind of praise that has some Soviet intellectuals privately making comparisons to the

Leader Quits Neo-Fascist Party in Italy

president of the neo-Fastist party. Adm. Gino Birindelil, resigned today in a dispute over terrorism

by extreme rightlists.

He also gave up membership in the party, known as the Italian Social Movement (MSI), setting off speculation that a spilt between moderates and extremists in Italian neo-Fascism may be

in the making.

The admiral typifies middleaged and elderly nationalists and anti-Communists who later have about the leather-jacketed young street fighters and bombers on the fringe of neo-Pascism.

The MSI party polled 2.9 million votes-3.7 percent of Italy's electorate—in the netional parliamentary elections in May, 1972. Its voting strength appears to have declined lately, as shown by a regional election in Sardinla earlier this month.

The admiral said in a statement today that in Italy's present greve economic and political crisis it was of vital importance not to ellow the "three million right-wing votes to remain

This was understood to mean that the admiral favored collaboration of moderates on the right with the dominant Christian Democratic party and with the moderate left. The neo-Fascist party has so far been in opposition to every Italian government since its foundation in 1946. Moderates in the party mey now follow Adm. Birindelli's example

and seek a new political home for The neo-Fascist secretary Giorgio Almirante, said he was not surprised by Adm. Birindelli's withdrawal from the party. The admiral's decision, Mr. Almirante predicted, would be exploited for "base political maneuvers."

Anzac Nations, Japan Criticize **British A-Test**

Ford's Golf Strikingly Familiar

MINNEAPOLIS. June 35 (NYT). -- Vice-President, Ford, in an incident that recalled his predecessor's experience, struck a spectator in the head when teeing off yesterday in Duff's Celebrity Golf Tournament.

The spectator, Tom Gerard, 17. was taken to a hospital but was released after doctors determined that he had only a minor bump on the head. The Vice-President was unaware of the mishap until informed by aides during the tourney.

Mr. Ford, teeing off later on the 16th hole, hit a golf cart carrying a policeman. The officer was not injured. The beaning of a spectator

was reminiscent of the incident several years ago when Spiro Agnaw, then Vice-President, accidentally hit golf pro Doug Sanders during a match.

Mr. Ford said of yesterday's incident: "I hope and trust his injury is not serious and I'm told by authorities that it is not. It's very regrettable and I'm deeply sorry such an unfortunate incident took place." ..

The mishap occurred when Mr. Ford's first shot at Rolling Green Country Club here sliced to the right. Aides said that the ball hit a tree and then grazed the teen-ager's head. Bystanders, however, said that the youth was hit directly.

Mr. Ford. who has a 17 handicap, shot a 16-over-par on 16 holes, carding a 44 on - the first nine and 37 on the seven holes that he played on the back nine.

Vixon Copter Gift **FoSadat Queried**

WASHINGTON June 25 (AP). Sen. Robert Byrd, D-W.Va., id yesterday that President ixon's gift of a \$2-million heltpter to Egyptian President war Sadat amounts to a "cava-T use" of tax dollars.

The practice of foreign relams is at best a delicate art. and occurs to me that efforts to rchase friendship in such a uner are questionable on their e," Sen. Byrd said.

Mr. Nixon took the helicopter

th him on his recent trip to the ddle East and gave it to Mr. dat while visiting Egypt. Sen. rd said: "The question that nes immediately to mind is the vious one: Was this helicopter, igned by the military to Mr. ton, his to give away to the ad of a foreign government?" The senator added that the "is symptomatic of a protetary concept of the American esidency that is at variance th the view of most Americans at it should be a trusteeship."

crimes and misdemeanors were brought by the House. A two-thirds Senate vote is required for conviction and removal from of-

But for the past few weeks, fol-lowing Mr. Nixon's announced decision to reject future suppoenas for evidence about the Watergate scandal, doubts over the outcome have been growing.

Conservative senators who have not taken a public position on the President's guilt or innocence attributed these doubts, in recent interviews, largely to the stoneof Mr. Nixon and his la yers. All of the senators questioned said that they were still striving, as potential judges in an impeachment trial, to keep open

But the consensus was that stonewalling could not help the President and that it could well hart him because of the inference that might be drawn-namely. that he was trying to withhold damaging evidence.

Sen. Norris Cotton, R-N.H., counts himself as among perhaps 30 or 35 senators "who are really trying to keep open minds." . He also one of Mr. Nixon's oldest and closest friends.

But "stonewalling - withholding evidence—is bound to affect the outcome" of the impeachment proceedings, he remarked.
Aside from its effect on senators who might judge the case, he said the President's tactics appeared to be moving public opinion toward a point where it would be politically acceptable for some conservative senators to vote for conviction, whereas

otherwise it would have been extremely risky to do so. Sen. Cotton, who is retiring at the end of the year at the age of 74 after 12 years in Congress, said he did not know how "even I" might be influenced by public

opinion. However, he added: 'I am not

going to say or even think what I would do until I see the full evidence."

"It can't help, and it may hurt," Sen. John McClellan, D-Ark., said in appraising the effect of stonewalling.

None of the senators interviewed has taken a public position on the President's guilt or imposence, and Sen. McClellan said, "I hope I won't have to." The implication was that he hoped the House would not find grounds for im-

Saxbe Against Quick Release Of Jailed Watergate Figures

By William L. Claiborne

25 (WP).—Attorney General William Saxbe said yesterday that convicted Watergate conspirators who go to prison should not be released in "the wink of an eye."

"It is hardly reassuring when one man goes to prison for years for theft while another man involved in a conspiracy to steal our freedoms is in and out of jail in the wink of an eye," Mr. Saxbe told the National Associa-tion of State Attorney Generals at an annual conference here.

"The message has got to go out all over the country-there will be no more dirty tricks, not by anybody for any reason," Mr.

Later, in an interview, Mr. Saxbe said he was not aliuding to any Watergate defendant in questions about his views on the lengths of sentences already imposed on several Nixon administration officials.

Coison Sentence Longest The longest sentence so far was given to former White House aide Charles Colson, who on Friday received one to three years on

his guilty plea to disseminating defamatory information about Deniel Ellsberg, defendant in the Pentagon papers case. Mr. Saxbe said the problem of

sentencing high government of-ficials involved in the Watergate scandals has created a "crunch" for jurists and other law-enforcement policy makers. "People say prisons are out-moded, that no one should go to jail anymore . . . but at the same time, with [former Vice-Presidenti Agnew, they say, Throw the book at Agnew... Mr.

Saxbe said. He characterized the dilemma as "walking the razor'a edge." adding that his personal opinion on sentencing convicted government officials has been guided by the belief that "I don't want the people of this country to

EXPOSITION PRESS. INC.

Stennis, 73, in Strong Comeback From Wounds

By Spencer Rich

WASHINGTON, June 25 (WP). -When Sen John Stennis, D-Miss, the 73-year-old chairman of the Armed Services Committee, walked off the Senate floor June 11, it marked the latest high point of a long and celebrated career in public life.

Sen Stennis after a grueling seven-day debate in which he was sometimes on his feet for hours at a time, had just shepberded to passage the \$21.9 billion military procurement bill. With his booming voice, his pacing, his capacity to espture attention when he rose to speak, Sen. Stennis dominated the debata and won all the major votes. _

The procurement measure was the first major hill on which he has acted as floor manager since January, 1973, and it demonstrated an amazing physical comeback for the Mississippi Democrat

Just 17 months ago, on Jan. 30, 1973. Sen. Stennis was shot twicc by holdup men as he got out of his automobile in front of his Washington home. His pancreas was "slivered," as the doctors at Walter Reed Army Hospital later told him. He lost large quantities of blood and did not fully regain consciousness for weeks. He wondered whether he would ever walk again, let alone return to the Senate.

Will to Recover

His performance as floor manager on the procurement bill illustrates that the will to recover and a powerful physique kept in trim hy exercise have enabled the senator to regain much of his old vigor and force.

But there were many moments, especially in the weeks immediately after the shooting, when he suspected he would not make it, he said in an interview.

"Early on, I thought about dying, and one night I dreamed I saw a newspaper headline, 'Stennis Dies in His Sleep,' When I was coming and going out of consciousness in the early weeks and very weak, and had been told how seriously ill I was, I fully realized that I might pass away at any time.

Describing the first days in the hospital, he said, "Well, you have fleeting moments of consciousness. out it was two weeks hefore I had conscious minutes at a time and could actively think Impairment of functions, that was the great question I would think about-impaired mobility. You want to be useful. They kept examining me for signs of

Sen. Stennnis said he had not been fully conscious and able to think clearly until three weeks after he was shot.

He had one wound in the leg but "that didn't hit a vital organ or break a bone." he said. The serious wound was "just at the beltline on the left side. It affected my pancreas, colon and portal vein, which supplies blood

paralysis."

COEUR D'ALENE, Idaho, June think that there are two classes of justice, one for the rich and one for the poor. He also said he is particularly

offended when immunity is granted for the sole purpose of extracting testimony against other defendants, and when a defendant is prosecuted for contempt for reneging on a trace of immunity for testimony.

Mr. Saxbe characterized this

practice, whether used to excess scandal or by local law-enforcement officials in routine criminal cases, as a "dirty trick."

to the stomach. The vein was not four only a week. He also litles. He is up to 170 pounds,

almost cut in two." Sen. Stennis has gained renor n as a physical-fitness man. "l

was a hunter, used to work out in the gym, I sique that withstood the shock swam, pulled wall weights, used of the wounds and he has now

hthan you think.

diet implies that the individual will also go off the diet, so we don't say much about what to eat or how much," he said at a news conference. Instead, tha behavior - modification method emphasizes helping the person

Brief UNESCO Strike

PARIS, June 25 (AP).--Personnel at UNESCO staged a halfday strike this morning over pay and tenure demands. The walkout forced cancellation of an executive council meeting about the proposed admission of Gulnea-Bissau and San Marino to the UN's educational, scientific and cultural unit.

to learn why he eats and shows him how he can master it.

A key to the approach is to keep a written record of every morsel of food swallowed day and night and the conditions under which it was eaten-what time, with whom and how the patient was feeling. Such a record. Dr. Stunkard sald, reveals to the person clues as to what drives him to eat.

For example, some people learn that they eat only in one room or while they are engaged in a particular activity, such as watching television.

One woman, upon studying her record realized how often she ate when she was angry. Many peo-ple, Dr. Stunkard said, find that they eat while depressed or anxious.

Nobody, according to the psychiatrist, is asked to restrict his intake of food, so patients are not hurdened psychologically hy the expectation of being deprived of food while under treatment. They are also taught tricks like eating clowly. Dr. Stunkard

believes that obese persons eat more rapidly than others. Because it takes about 20 minutes for the signal of satiety to travel from the brain, they consume much more than would normally he required to give the sensation of fullness, he said. Subjects are also taught to

chew clowly, swallow and wait two minutes before taking an-

Loss Maintained

"We are finding that about half the subjects lose 20 pounds or more in 10 to 20 weeks." Dr. Stunkard said. "In traditional therapies, one-fourth lose 20 pounds but most of them regain it. In our study, everyone who lost weight maintained the loss after one year."

The psychiatrist eaid many reearch studies to evaluate the hehavior - modification approach are under way. He estimated that perhaps 1.500 persons have been treated in such studies eince 1967, when the first report was published by Richord Stuart. a social worker.

Unlike fad diets, which Dr. Stunkard said are usually nutritionally unbalanced, most people on behavior modification tend to have a good diet. This is because most of them have had a good deal of nutritional advice in the past and know what they should eat.

Likewise, he said, the subjects do not appear to suffer the syniptoms of nervousness, irritability or depression which he sald are common in people on a

Federal Judge Takes Appeal By Calley Under Advisement

COLUMBUS, June 25 (AP),-A federal judge took William Calley jr.'s appeal of his My Lai murder conviction under advisement today after rejecting a new request that ha free Calley on

In Washington today, the Su-preme Court also denied an application for bail pending review by a civilian court of Calley's 1971 court-martial conviction. The Supreme Court, in a brief

order, refused to stay a decision of a three-judge panel of the U.S. Circuit Court of Appeals in New Orleans refusing to continue Calley's bail. He returned to confinement in an Army stockade hast week. In the proceedings here, the

former Army lieutenant's attorneys argued that Gen. William Vietnam in 1963, influenced the murder case against Calley while publicly denying his own re-

sponsibility.

Gen. Westmoreland "commended and congratulated C. Company on a job well done at

operation," attorney Bouston Gordon said.
. He also argued that it was

"grossly unfair" to try Calley on a murder statute that applies to a civilian situation rather than on a violation of the laws of war. Capt, Edward Newton, one of five Army prosecutors, argued that the civilian slayings Calley

in a combat situation. "There were no [enemy] soldiers at My Lai," he said. "There were just babies too small to crawl, old men and women . . . There was a ditch into which people were herded and squatted

This was just not a combat situation, although it was antici-My Lai, putting an after-the-before the Army formally accused fact stamp of approval on the him of killing My Lai civilians.

Films Shown to U.S. Doctors To Help Them Care for Dying

tients."

By Lawrence K. Altman

SEATTLE. June 25 (NYT) .- which groups, if any, would ben-For centuries doctors have learned how to handle death and tha dying patient not in medical school but through experience.

Now, as the public is paying greater attention to the bedside manner of their doctors, physicians are turning to audiovisual tools to learn how to care better for patients with terminal ill-.

At what was perhaps the first meeting of its kind, representatives from more than half thenation's medical schools watched a series of films. videotapes and similar material that provoked emotional responses and debates about death.

The meeting, co-sponsored by the Universitles of Minnesota and Washington, ended here Friday. Callous Attitudes

In most cases, young doctors have had very little contact with tha elderly before they begin caring for patients who are in their 70s and 80s. Many believe that callous attitudes toward older persons derive from a lack of personal experience with them. Sponsors of the meeting said that that was a problem they hoped might be corrected by the use of

In a University of Southern California film, for example, a 61-year-old cancer patient criticized his physicians as insensitive to his pain. The patient said he had felt so abandoned that he left a hospital against medical advice,

His attack angered medical professors in the audience, but at least one, Dr. Henry Aranow of Columbia's College of Physicians and Surgeons, said he considered viewing the film mandatory for young doctors. Another film showed a corpse

from a variety of angles. After watching it silently, the participants held lively debates about

Iowa Is Disaster Area

WASHINGTON, June 25 (Reuters: .- President Nixon yesterday declared Iowa a major disaster area as a result of ervere storms which began in mld-May and caused widespread damage.

pated that it would be," he said. Mr. Gordon also argued that Westmoreland, who was in the Army illegally extended court-charge of American troops in martial jurisdiction over Calley, who was charged by the Army on Sept. 5, 1969, the day before he was due for a discharge. He said that the court-martial was not convened prior to Calley's discharge and that Calley had presented himself for discharge

> efit most from seeing the film. Dr. Robert Hillman, the con-

terview: "I don't know if we know to use the media in the curriculum on death. But this was an experiment to learn what would happen if we used such modern means of communication to make medical students more sensitive to the problems of dying pa-

Tears and Anger

ference chairman, said in an in-

The program caused tears, anger and frustration among participants who said they had

come for mutual support as much as to learn something new. It also caused some to go home early. After the participante split into small groups, their discussions became so emotionally charged

that the groups further splinter-

ed to the point that one doctor said. "I felt I was talking only to myself." While most participants urged doctors to develop a greater awareness of the emotional probiems associated with death, some pointed out that a conflict occurs when a patient demands from the physician both the highest degree of medical sophistication

and a death with dignity. "At what point do you want your physician to give up the noble fight?" asked Dr. Cari Eledorfer, a psychiatrist from the University of Washington.

Called 'Legislative Dictatorship'

GOP Steals Democrat Slogar On a 'Veto-Proof Congress'

By David S. Broder

WASHINGTON, June 25 (WP). -In the boldest political burglary since the Watergate break-in, Republican party leaders have stolen the Democratic slogan for

"veto-proof Congress." The AFL-CIO officials and top Democrats thought would lure voters by the millions in November, is now being presented as a nightmare possibility by Republican orators.

What began with George Meany's plea to union members to elect a Congress that will "teli the President to go jump in tha lake" has been seized on by Vice-President Pord as an alarming threat of "legislative dictator-

Some Democrats have repudiated the slogan while others continue to employ it. Peter Hart, a Democratic poli-taker, told a recent caucus of Democratic governors that the "veto-proof Conslogan was "the single worst and most disastrous concept ever devised by elements of the Democratic party." Other Democratic campaign officials agree strongly.

Fund-Eaising Appeal

Nevertheless, the concept has been endorsed by tha chairman the Democratic governors caucus and has been used :n a recent fund-raising appeal from the chairmen of the Democratic Senate and House campaign committees.

Just last week, the AFL-CIO Committee on Political Education decided, after some debate, not to scrap the slogan, in which it has a heavy investment of campaign materials.

This week's Gallup poli reports that Democrats hold a large enough advantage in popular support to win two-thirds majorities in the House and Senate if the election were being held

It takes a two-thirds majority vote in the House and in the Senate to override a presidential veto. Democrats now hold 248 seats in the House and 58 in the Senate, leaving them 42 House seats and nine Senate seats short of a nominal two-thirds major-

ity in each chamber-290 in the

House, 67 in the Senate. The more optimistic Democrats and more pessimistic Republicans see a chance of a 42seat shift in the House, although most estimates are lower. No one in citier party sees the likelihood of Democrats making a net gain of anything like nine seats in the Senate, where only 14 Republican seats are up for.

election this year. .. Gauge of Changes But since few issues fall strictly on party lines, a more accurate gauge of the changes needed to produce "veto-proof" majorities in the 94th Congress may be derived from the margins by which President Nixon's vetoes have been decided in this Con-

Since January of last year, Mr. Nixon has vetoed 10 bills and been overridden only once on the War Powers Act limiting the President's authority to commit U.S. forces abroad without congressional approval. His margins in having his vetoes sustained have ranged from 4 to 10 votes in the Senate and from.

6 to 51 in the House. It was Mr. Meany's men who brought the "veto-proof" slogan into 1974 politics. Al Zack, the federation publicity director, said, I don't know if we originated or stole it from somebody else, but the first time I heard it was-in a speech Al Barkan [the direc-

tor of COPE) made last fall." And in a COPE film about the record of Mr. Nixon's vetoes, the narrator says, "We can elect 'a veto-proof Congress, and tell the President to go jump in the lake."

Mr. Meany himself then comes on with a pep talk asserting that "the challenge this year is to neutralize the Nixon veto power. We must elect a veto-proof Con-

Labor Control Because the slogan started with

the AFL-CIO, the earliest Re-publican rebuttals focused on the dangers of labor control of the next Congress. The House mmorty leader, John Rhodes, R-Ariz, told the National Right-to-Work Committee May 10 that "a vetoproof, labor-dominated Congress" would epell "government centralization, more waste and mismanagement, and stratospheric government epending."

From that beginning, the rhetoric has mounted as Republicans suggest that a heavily Democratic Congress would cause every imaginable ill.

"Legislative dictatorship." Mr. Ford said, would "open the doors. of the Tressury and pile deficit. on deficit." White House counselor Dean

Burch foresaw "a very frightening thing, an orgy of welfare spending."

"I'm afraid Congress would run amok," said Sen. Bill Brock, R-Tenn, chairman of the Republican Senatorial Campaign Committee, a system of the state of the state of

"Any election that resulted in such a complete imbalance of power would do great violence. to our system."

It would cost an additional \$25.8 billion in spending in two years, the committee said in a research mono

research memo. "If enough Democrats are elected in the fall to achieve the

majority necessary for a velproof Congress, then we'd all be ter buckle up for one of the bigest raids on the U.S. Treasu this country has ever seen." an ed the GOP national chairma George Bush. "The excess the New Deal would pale F comparison."

Democrats Shaken

Somewhat shaken by this so den Republican zest for the "veto-proof" issue, some Demi cratic leaders act as if the wished that they had never hear

Sen. Lloyd Bentsen. D-Tex-chairman of the Democrat Senatorial Campaign Committee said last month that "I do n use the phrase 'veto-proof Cor gress' and I think it is a tactic error to use it. I never agre with that idea. What neither elde in the deba appears to have noticed or least has decided not to publich

is the record of what happens after the election of 1958 who the Democrats gained 49 sea. in the House and 15 in the Sei ate and held virtual two-third majorities: 64 of 98 senators ar 282 of 436 representatives.

President Eisenhower, reactir atrongly to the challenge of it majorities, used his veto powe 44 times in 1959 and 1960. R was overridden twice.

Nazi-Related Cases Tried in W. Germany Ex-Aide Gets Life; A Foe Goes On Trial

By Joe Alex Morris Jr.
BONN, June 35.—In different
ways, the Nazi past made news
in courts in Hamburg and Colosne today.

logne today.

In Hamburg, Gerhard Erren, 73 was sentenced to life imprisonment after being found responsible either directly or indirectly, for the death of 15,000 Jews in the conquered Eastern territories during World War II. Erren was chief of the Nazi civil administration in Slomin, in Ruthenia during 1941 and 1942 when the Jewish population there was divided into slava labor groups and those destined for liquida-

The same court sentenced a gendarmeric officer, who assisted him at the time, to three years' imprisonment as an accessory to murder. The case was only a small part of the long process of prosecuting Nazis in war-crimes trials.

In Cologne, Beate Klarafeld, 35, went on trial for attempting in kidnap another old Nazi, Dr. Kurt Lischka, and take him to France. Lischka had been sentenced by a French court in 1950 to life imprisonment for his role in the deportation of Freoch Jews to death camps during the war. But he could not be extradited, nor could he be retried here in Garmany.

Mrs. Klarsfeld tried to kidnap
Lischka in 1971 and get him to
France, where he could be imprisoned. The Berlin-born woman
is not Jewish herself, but she is
married to 2 French Jew and
for years has conducted a personal crusade to expose old Nazis
who have successfully shed their
past and built new lives.

The kidnap attempt was amateurish and immgled, but it exposed Lischka to his Cologne neighbors. Mrs. Kiarsfeld voluntarily returned to stand trial to stress the fact that a treaty between France and West Germany which would permit retrial in Germany if Nazi war criminals already sentenced in France has been stuck in the West German parliament for more than three years.

The treaty is pending in both the Foreign Affairs and Judicial Committees of the Bundestag, with no signs of early action forthcoming. Parliament is already in summer recess.

Soviet Diplomat Returns to Peking For Border Talks

MOSCOW, June 25 (UPI)—
Leenid Bytchev, head of the
Soviet delegation at the SinoSoviet border talks, returned to
Peking today to resume negotiations suspended last fall. Tass
said. Mr. Hylchev, a deputy foreign minister, was met hy his
opposite number, Yu Chan, the
Soviet press agency said.
The meetings are being resum-

The meetings are being resumed despite new stresses in Sino-Soriet relations. Peking expelled five Soviet diplomats last January for spying and the Russians retaliated by expelling a Chinese diplomat who was already on his way home.

On March 14 the Russians said that one of their army helicopters, lost while on a medical mission, had been forced down across the border by had weather. China said the three crew members had been spying and it has held them and the craft sloce, despite repeated Soviet protests. Border talks between the two countries began in late 1969, several months after clashes along the 4,350-mile frontier claimed the lives of an estimated 100 Soviet and Chinese soldiers. The talks have been held spiradically since then with little sign of progress. The Chinese assert that 19th-century czars unlawfully annexed more than 500,000 square miles of Chinese

Suit Threatens

Milan Airport

Milan June 25 (AP).—Milan magistrates threatened today to suspend all night flights from the Milan international airport at Linate because jet noise seriously disturbs the rest of thousands of inhabitants of four

villages close to the airport.

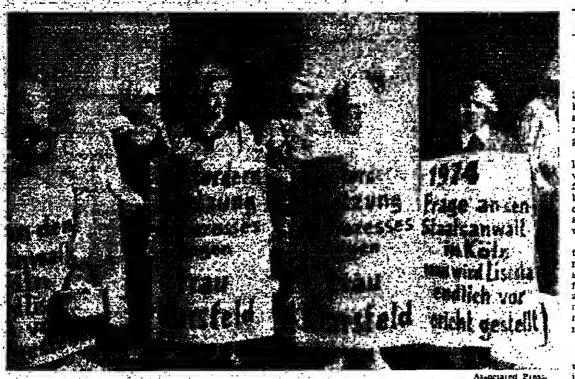

The magistrates said that only a change of routes decided by the Civil Avietion Ministry could stop the legal action against night flights brought by the four vil-

lages.
The ministry however was expected to face serious problems in deciming new routes. The airport after the building boom in the 1950s is practically surrounded by illages and recidential quarters.

By Edward Cody

MCLEOD GANJE, India, June 25 (AP).—The Dalai Lama of Thet dreams of returning to the mountain realm he fied 15 years ago after an unsuccessful revolt against Chinese rule:

His dream is nourished by the faith of 85,000 Tibetan followers in India and a Buddhist philosophy that buoys his confidence despite the apparent futility of opposing Peking's entrenched rule over Tibet.

"We firmly believe that the situation will change mamly because of the Tibetan people's determination, he told a visitor, "Definitely, something will hap-

His contemplative life in this former mountain resort about 300 miles northwest of New Delhi is hunt on the serece confidence that internal political conflicts one day will force China's rulers to relinquish their grip.

Ontside Ideas

But years have passed since the Dalai Lama sought refuge in India for his exile government and retinue of 200 Buddhist monks. Outside ideas have infected the Tibetan community of 2.000 people on this remote mountainside—and some have reached even the 38-year-old spiritual leader himself.

In an hourlong interview, the Dalai Lama expressed interest in the spiritual shifts of American voung people and said he wants to go to the United States to see for himself.

"The mental unrest that is there. I am very interested in it." he said. "I want to be involved in it. I want to meet these people and talk with them to see if there is method or not.

"As I am a religious person. I am just sitting and praying. I want to do something," he said.

The Dalai Lama, believed by his followers to be the 14th reincarnation of a deity, rises with the sun and drapes himself in red robes. After an hour of praying, he has breakfast and then spends the morning in meditation overlooking the Kangra Valley, almost 6,000 feet helow.

His afternoons are devoted to refugee affairs and receiving visitors. In the evening he studies Lamaist Buddhist theology and philosophy.

85,000 Have Fled

Since the unsuccessful revolt in 1959, about 85,000 Tibetans have fled the Chinese occupation. In addition to the 65,000 living in Indian refugee centers,

Security Is Tight For Tito in Bonn

BONN. June 25 (Reuters).— River patrol boats, helicopters and hundreds of armed police guarded President Tito of Yugoslavia here today as hetheld political talks with Chancellor Helmut Schmidt for the second consecutive day.

President Tito, 82 is paying his first state visit to West Germany, with the aim of intensifying economic cooperation. Security is tight to protect him from possible attacks by exiled Yugoslav political extremists during his four-day visit.

At an official luncheon today, President Tito toasted "comprehensive cooperation between our countries" and said that differences in political views should not present any obstacles. He said that his country's independence is the best contribution it can make to security in Europe.

Food Profiteering Rife in Segmented Cambodia

By David K. Shipler

PHNOM PENH Cambodia, June 25 (NYT).—With its major critic besieged by Communist-len insurgents. Cambodia has become riddled with profiteering—not on gold or opium, but on food. It takes half an hour for a load of fresh fish to triple a value as it is flown the 50 miles from Kompong Chihaang to this beleaguered capital. Over that distance, beef prices soar and sugar prices rise 50 percent as

well. Merchants who are orand new to the food bisiness are reported making profus of \$10,000 a days supply by flying the scarce stapic; from the country's agricultural areas, over insurgent-held territory and into Ponom Penin vices many families spend their entire mecomes just to feed themselves

In an economy stagnated by war, this is one of the only beauting segments. Sixteen pit-ale alrines are operating 30-year and DC-3s that jam Prinom Penns Pochentong airport, turning the apron into a busy truck terminal and marketplace.

Ptiots and airline officials toport that merchants try to o etload planes by tampering with scales or by paying pilots to carrian extra few hundred pounds

The sugar comes from Thatlai of shipped by road to Battamband or Kompong Cuhnang, Pierr women crowd along the airstrip selling 22-pound bags for 2,500 Riels (about 56).

man can double his days pay by simply carrying one bag in a 30-minute flight from Kompong Chinang to Phnom Penh.

But the hig money is in tons.

But the big mone, is in tone, not pounds. The food merchants are almost all ethnic Chinese, and their use of the shortages to drive up prices has stirred the latent anti-Chinese feeling that pervades Indochina.

The merchants buy fresh fish for about 34 cents a pound in Kompong Chhuang and seil it for about \$1 in Plinom Penh.

The cost of airlifting it to the rapital runs only 10 cents a pound, so that even with that expense, plus the bribery and the low wages paid to loaders and truck drivers, businessmen estimate that merchants make at least 55 cents profit a pound.

A DC-3 carries 7.000 pounds and generally flies two to three trips a day. That adds up to a daily profit of \$7.700 to \$11.500. The airlift has been made pos-

The airlift has been made possible by the United States, which byte all the aviation fire with dollars sells it to private distribntors for treis and turns the riels over to the government.

An official said that Washington had agreed to increase fuel shipments on the conoution that they would not be sold on the clack market and that the attlines would fly only within Cambodia, transporting only ited.

"We do not want them fiying drugs in from Leos," one American remarked.

an remarked.
Fuel Comes up River

Filed Comes up the Mekong Fiver by convoy, zlong with American rice, which is then flown from Phnom Penh to other besieved sittes.

These flights are often forced on private airlines by the Cambodian government, which never pays, airlines essecutives complain. Pilots say they are also required to use orivate planes to ferry troons and ammunition around the country without charge.

munition around the country without charge.

"We pay the [control] tower a few thousand riels so we don't have to fly these every day." A

few thousand rich so we don't have to fly these every day." a pilot asserted, and they say, "OK—tomorrow."

An airline executive pulled out a netchook listing 12 different and officials who had

a notebook listing 12 different agencies and officials who had to be bribed in a provincial arport, including the military chief who allegedly receives about \$12.50 each time a plane lands.

One pilot complained that in

this helter-skelter bribery system, every man is out for himself.

Cambodia cannot pian these days. It is a country scrambling to live from day to day. "Kinners !Cambodians) used to be snit, very soft." a young Cambodian observed sadly. "But not now."

Kissinger's Response

his news conference on Monday. He moved Forthrightly to dispose of the deadly suggestion that at the first Nixon-Brezhnev zummit in 1972 the administration had secretly agreed to allow Moscow more missiles and Washington fewer missiles than was publicly announced. The alleged missile disparity might not have been of much military consequence. But a proven disparity between administration pronouncement and actual fact would have aggravated greatly the pubstantial problem Mr. Nixon already faces in persuading the public that he is still fit to conduct foreign policy. On the eve of his third summit meeting with Mr. Brezhnev, the one thing Mr. Nixon does not need is another challenge to his negotiating anthority. Secretary Kissinger, whose credfbility is also under challenge in the matter of wiretaps, could scarcely have gone on if hiz word on missiles had been shown to be

This truly profound crists arose last Friday From a statement issued by Sen. Henry Eackson, D. Wash., who is at once the admiristration's leading critic-from the righton defense issues and a 1976 presidential hopeful, Newly disclosed Soviet-American "understandings," said Mr. Jackson, would allow the Russians up to 70 more than the 250 modern submarine-launched missiles permitted under the five-year interim agreement on offensive weapons signed in 1972. Similarly, he added, the administration had privately assured Moscow it would build up the American sub force only to 656 missiles rather than to the 710 permitted by the agreement over its five-year span. Sen. Jackson, it is recalled, recently warned that the President's political need for a foreign policy triumph could induce him to make an unwise "quick fix" nuclear deal at the Moscow summit, which begins later this week. His statements of last Friday added to the impression that Mr. Nixon is unrellable and should not be heading for the Kremlin at all. * * *

Dr. Kissinger, however, gave what struck us as a persuasive enswer. He produced hitherto secret documents demonstrating that, even if the Russians do put new modern missiles on their old G-class subs-something, by the way, which not even Mr. Fackson expects them to do-then these missiles must fall under the public 950 ceiling. This American interpretation was put in writing after the 1973 summit and, Secretary Klasinger emphasized, reading from the document itself the Russians signed it-and have respected it.

President Nixon had indeed "told" Mr. Brezhnev that the United States would not use the for arms control agreements in the mutual option, written into the same agreement, to convert certain land-based missiles to sea-

Secretary Kissinger took on a vital job at based missiles in order to increase its sea force from 656 to the permitted 710. The reason for not so converting was that the United States was on the verge of announcing its program to hulld the new Trident subs, due for launching not earlier than 1978, the year after the five-year interim agreement of 1972 was to expire, so why huild more old subs in the interim? The United States had claimed the right to convert, the secretary added, to match the same right claimed by the Russians. And why did Mr. Nixon tell Mr. Brezhnev? Because the Trident program would quickly become apparent to Moscow in any event, and as "a gesture ... that leaders sometimes engage in for the general atmosphere of relationships." Is this "startling," in Mr. Jackon's word? Hardly.

> Secretary Kissinger seems to have removed a dark and dangerous clond from the administration's diplomacy. Bnt Sen. Jackson, who did not find reason to raise these challenges to the 1972 agreement until the week before the upcoming summit, seems reluctant to concede that he has not provided substantial evidence to sustain his challenges. So the affair may not yet be closed.

> * * * The episode reveals, however, an important flaw-fortunately a remediable flaw-in the administration's approach to arms control negotiations. There was indeed some secret back-and-forth with the Russians over the G-class subs. The result of it did not alter the public record but the trace of it, once it became evident, was bound to arouse questions—that are all the harder to handle in the Watergate atmosphere. Similarly, if Mr. Nixon-knowing that the Trident program was about to begin-could confide to Mr. Brezhnev that therefore the United States would not use its option to put 710 missees to see by 1977, why could he not tell the same to Congress and the public? In both instances, sensible decisions that would not have suffered from the light of day came to look somewhat dubious, and provided fooder to critics, when they first emerged in hearings before Congress. If Sen. Jackson has played harder than he might in fulfilling his responsibility for congressional review. then the administration might have precluded any play at all by earlier putting more of the Soviet-American exchanges on the public record.

No doubt the Russians were comewhat agog to find Secretary Rissinger come public with material the Russians would not dream of presenting to their own public. But they must learn-and perhaps they are learningthat the reason for going public is not the trivial one of easing some politician's Secretary Kissinger acknowledged that embarrassment but the basic and beneficial one of reinforcing American public support interest.

THE WASHINGTON POST.

Peron's Grim Milestone

of the return of Gen. Juan Peron from has been goaded ever more frequently into 18 years of exile that Argentina celebrated last week. President Peron himself was forced by an influenza attack to cancel a trip to Rosario to observe the anniversary. It was one of several illnesses that have incapacitated the 78-year-old general since he reassumed the presidency last October.

Guerrilla forces staged their own celebration by setting off bomba in Buenes Aires offices of four foreign business firms, dramatizing the campaign of urban terrorism and kidnapping that Gen. Peron thus far has been unable to bring under control. In his presence on Army Day last month. Gen. Leandro Anaya, the army commander, referred ominously to "the escalation" in terrorist activity and said the armed forces had decided to "participate decisively" in the drive to crush it.

Gen. Peron's supporters oad been confident that on his return to Argentina he would be able to curb the terrorists or even win them

It was not a very felicitous first anniversary to his Justicialist party panner. Instead, he assailing left-wing Peronist youth organizations, branding them "beardless intiltrators" and "mercenaries at the service of foreign

> In fact, trying to maintain order and cohesion in his own disparate ranks has been Gen. Peron's major headache. On two occasions this year, he has threatened to resign in an effort to triphten his forces into a measure of unity. Both times the threat has worked-temporarily-but it may prove

> a political weapon of diminishing utility. The thought has been forcing haself on many Argentines that the job of restoring unity and prosperity to a divided, dispirited country may be so much to ask of an ailing. 78-year-old caudillo-but the only afternative in sight would be a return to power of the armed forces, which were only too giad to relinquish the team in 1973 after seven years of inettective rule.

International Opinion

Portugal Starts to Restore Order

The introduction of some sort of control had become essential in Portugal. Since the April revolution, the press and radio had adopted a tone probably as far wide to the left of public opinion as the exaggerations to the right under the Caetano regime. Editorial staffs had become dominated by collectives of the radical left and had systematically been propagating the ideas of parties or more extreme than the Communists.

It remains to be sets, now far the new and massive controls will be able to root out this evil. And in any case, the basic problem is far deeper and stems from the fact that Portuguese intellectuals, and more particularly journalists, have had no ensure for decades to gain p-intest background and experience or practice responsible fournalism. The new freedom thus became too great a temptation to concretions

Introducing Atoms for Middle East Peace

By C. L. Sulzberger

WASHINGTON-When President Nixon promised to sell nuclear fuel and power plants to Egypt and Israel—the outstanding commitment of his Middle Eastern trip-he was in part carrying out a policy originally conceived by President Eisenhower and his former atomic energy chief in 1967, during the Lyndon Johnson administration.

The latter policy hoped to facilitate reace by developing the barren borderland between Egypt and Israel and (in the extreme south! between Jordan and Israel. The recommended means of carrying this out was to establish three large nuclear plants in those areas providing ample power for, among other things, mass desalting of water to irrisate the desert

The original blueprint was drawn up by Acm. Lewis Strauss right after the June, 1967, war in which Israel defeated its Arab neighbors. Strauss, who had been Eisenhower's AEC chairman, sent a memorandum on June 23 to the former President at his Gettys-burg, Pa., home.

Possibilities

Eisenhower immediately sensed the plan's peacemaking possibili-ties. He drew it to the attention of President Johnson both personally and through Ambassador Liewellyn Thompson, who had been assigned to brief him on Johnson's collegu; with Soviet Premier Ileggin at Glassboro. N.J. He sugg. Hed Johnson raise the subject with Eosygin, There is no sign this was done.

The logic developed by Eisenhower from the Strauss draft was that both Arabs and Israelis would gain something tangible from the proposal, thus removing fundamental causes of tension. Not only new sources of power but test quantities of fresh water mould be made available to an area which could then prove capable of absorbing the entire population of unhappy Palestinian Arab refugees.

Recalling the peacemaking mission of 1955, when he had sent Eric Johnston to the Middle East on a voyage of diplomatic ex-ploration. Eisenhower seid to me July 10, 1957 : "This makes the Johnston Plan look like a flea

against a dog." As Eisenhower thought, the United States should take the lead in facing the "real issues" of the region, shortage of water and the question of refugees. Two or three large nuclear plants were recrired with the idea of generat-

Saving Israel?

Now that President Nixon has

completed his tour of the Middle East it may be the proper time to

review the events of last October

then Israel was attacked. Mr.

Nixon has been given a great deal of undeserved credit for the

prompt aid the United States

many Jews and Israelis feel that

both recarding his domestic and

foreign policies, is close to blas-

The question Americans should

ask themselves is what would

have happened to our position in

the Middle East if the United

States had not given immediate

and massive aid to Israel when it

was needed. Would President Himm have been able to go in

triumph to Egypt. Israel and

Jordan and visit Saudi Arabia

and Syria? Of course not. After

the Virtuam "peace with honor" or debacle, whichever way one

wants to look as it, the United

States simply could not tolerate

another setback of a client state

supplied with American arms.

Had Israel been allowed to suffer

s defeat or worse, our entire

position vis-2-vis the Arab states

would have deteriorated beyond

the low point of 1967. Negotia-

tions in the energy crisis would

have been much more difficult

and, lest but not least, the stature

of the Soviet Union would have

It is quite reasonable to assume

that when Israel was in a crisis

been greatly enhanced

criticism of the President,

ing between 750 million and a ous to Israel and Jordan) noth-billion gallons of sweet water ing ever materialized. daily. He added:

"The bigger the plent, the more economic the operation. This water would cost more than the price of New York City water but it is cheap for a country that doesn't have water at all And Syria, Jordan, Israel and Egypt riculd all profit so much from such a plan that the people couldn't permit their governments to refuse participation."

Never Presented

Unfortunately, that chance was never officially presented. As far as I have been able to ascertain, Johnson let the idea drop. Although the Eisenhower-Strauss project envisioned two nuclear plants on the Mediterranean (in the area contiguous to both Israel and Egypt) and a third at the head of Aqaba Gulf (contigu- , both Arabs and Israelis and at

The project conceived of joint U.S. and private financing of a chartered corporation to initiate the program even prior to for-malized frontier accords between the states involved. It would have provided the area with perhaps two and a half times the water of the whole Jordan River system and its creation could have absorbed the idle labor reservoir of Arab refugees. Unfortunately this imaginative approach failed to galvaniza State Department or White House thinking in 1967.

The Nizon-Kissinger policy that has been broadly depicted by the President (who, after all, was Eisenhower's No. 2) will serve as a viable if delayed substitute to the stillborn original. It contains some of the same essentials—eimed at helping and also pacifying

creating the human and economic limate for peace.

No commitment seems to have been made on the Jordanian-Israeli area of Aqaba. Nor can one yet formally link the two halves of the program-Arab and Israeli -or analyze financing problems and economic implications. Yet nuclear power for desalting water was specifically discussed in Is-rael by Nixon and more generally reviewed with President Sadat in

The Nixon-Kissinger approach clearly seeks to create necessary political and human conditions for peace before constructing its economic basis, and this may prove to be sensible. Either way, the goal is the same: a durable settlement in the Middle East and (as the first Strauss draft sug-gested): "The beginning of a new life in the lands of the oldest.

civilizations."

India's Nuclear Explosion

By Barkat M. Khokhar MALIFAX, Nova Scotia.—Let us ister. Zulfikar All Bhutto, was

stand in New Delhi and view the world through Indian binoculars. Let us also make a close examination of conditions inside India and raise the question of why India set off its first nuclear explosion. Why at this time? There are two possible reasons. the sinking morate of 560 million nese collusion and their combined people who are terribly sick in every way. It is the gravest time of crists in India since independence. People are fed up with the government because of rampant corruption, inflation and shortages of food and the necessittes of life. Rich and poor are disillusioned. The government of

Mrs. Indira Gandhi has not been

able to shake the citadels of

bureaucracy and corruption. The government had to divert attention from the economic front and this was the best possible way to prove its credibility and

Bread and Butter

How long will this explosion divert the minds of the hungry masses? If the people's hopes are not met, they are likely to be more disappointed than before. It may cause incalculable harm to India's leadership. The main problem in India is bread and butter, not bullets and bombs. Second, Pakistan's Prime Min-

ment concluded that it was in

the best interest of the United

States to start an immediate air-

lift. President Nixon, weakened

by Watergate and its ramifica-

tions, went along with this rec-ommendation. The dramatic

connecdation. The dramatic change in the American position

in the Middle East should be

attributed largely to the valor of

the Israelis. They redeemed with

their blood and U.S. arms some

of the loss America's reputation

and credibility suffered in South-

east Asia. It was this successful

combination which laid the foun-

dation for Dr. Kissinger's nego-tiations and, in turn, made Pres-

ident Nixon's triumphal tour to

WALTER SHELDON

the Middle East possible.

New York.

clicking his heels in Peking during May and possibly asking Premier Chou En-lat to do something for Pakistan about Kash-mir. Every time Mr. Bhntto goes to Peking, India has grave misgivings about his intentions. It a crucial moment and openly is possible that this explosion is sided with Pakistan. India's reply to Pakistani-Chimilitary threat to India.

What are the political and military advantages to India? India feels strongly that it must challenge China's leadership in Asia and the world. India must maintain a balance of power in Asia and not let China take undue advantage of its defeat in 1962 and its poverty. The bumiliation of 1963 set off a chain reaction. India started rearming and spends almost half of its revenue on military preparednes

The possession of a nuclear device enables India to demonstrate leadership to underdeveloped countries of Asia and Africa.

particularly Moslem countries. As an original and important member of the British Commonwealth, India may now command better attention in all Commonwealth countries, except Canada. Public opinion inside Canada is against this explosion and this may impair future relationships, Pakistan left the Commonwealth

pacity. The world is aghast that muclear tests were carried out by a. country that had consistently proclaimed the spirit of nonvio-lence to the world. This is certainly considered contrary to Mahatina Gandhi's doctrine of "ahimsa" ("not to kill").

It can be argued that the development is for peaceful pur-poses. India's intentions may be good, though its foes and friends are not happy about it. It appears that India wanted to strike a serious blow against poverty and wanted a breakthrough for economic progress and technological advancement. The great Jawaharlal Nehru, first prime minister of India, had a scientific mind and established laboratories in different parts of India. Whether this explosion fulfills his dream of making India self-reliant in nuclear energy for peaceful pur-poses remains to be seen.

Barkat M. Khokhar, now at the Atlantic School of Theology in Halifax, is a retired Indian Army colonel. He wrote this article for The New York Times.

ann ambiguous, just as he was in the White House. Public Relations

Indeed, public relations gim-mickry by Colson and his lawyer, David Shapiro, prior to his sen-tending last Friday are strikingly similar to Colson's White House operations. Although there is no reason to question the sincerity of Colson's religious conversion, there is reason to question bow much it has changed the way he approaches a problem.

mains controversial, disruptive

credited accusations.

His revelations of giving early

long run.

Shapiro contacted the special prosecutor to negotiate Colson's guilty plea before, not after, the widely publicized meeting of Colson's prayer group that allegedly led him to confess. Contrary to what Colson told the prayer group, he was never offered the option of pleading guilty to a single misdemeanor.

The outraged prosecutors blamed the crafty Shapiro for planting the misdemeanor story in the press, attempting to generate public opposition to a prison sen-tence on grounds that Colson had "voluntarily" pleaded guilty to a felony instead of a misdemeanor. The prosecutors came to regard Shapiro as the most annoyingly troublesome defense lawyer they

have encountered.

The prosecutors have always viewed any possible information gleaned from Colson as an unexpected bonus. Expecting no great dividends, they have retrue of Colson's widely-publicized statement to the prosecutors and the House committee that he warned President Nixon in January, 1973 that John Mitchell and other re-election campaign officials probably were implicated in

Watergate. The matter has been hotly dobated in the Indian Parliament. Short Memory Britain is accused of selling the The stir caused by these stateisland to the United States, India

questions the intentions of these two Western powers regarding domination of Indian waters.

ments underscores Washington's collective short memory. In June, 1973, long before his religious conversion and while enthusiastically defending the President, Colson told essentially the same story publicly.

Nor do lawyers put much value on Colson's courtroom charge that Mr. Nixon had "urged me to disseminate damaging information about Daniel Elisberg," causing Colson's obstruction of justice felony. To some lawyers, this was a ploy for the sympathy of Judge Gerhard Gesell, infuriated by the President's cavalier attitude toward court suppoenss, Unless bolstered by future testimony, it scarcely seems to affect the impeachment case.

Colson's accusations of sinister CIA participation in Watergate duplicate what he has privately told Sen. Howard Baker of Tennessee, charges long since written off as groundless by a House investigation. But Colson's picinvestigation. But Colsons parfled captive of the CIA could lead the impeachment proceedings into a trackless and time-consuming

wasteland Beyond the President, Colson is further confusing the chaotic Watergate picture by describing the CIA as an outlaw band of conspirators and Secretary of State Henry Kissinger as a de-moniac evil influence on the President, Colson's new religiosity ? seems so deep that this quite probably is his sincere vision of the truth. But Coison's vision of the truth as Mr. Nixon's fanatically loyal lieutenent was uniquely distorted. What he says now should be judged accordingly.

Discovered Accidentally

Yogurt May Really Be Good for You

By Jane E. Brody

'EW YORK WYT' - The ionestanding popular belief that yogurt is good for you may have a stronger base in scientific fact than has heretotore been realized. according to the accidental findings of a recent nutritional study among African Iribesmen,

The study indicates that some substance in voguri may capable of lowering the level of holesterot in the blood by lowering the amount the body produces and this in turn may belo protect against the development of atteroscierotic heart disease. which is epidemic in the United

Aithough at the moment this is a tentative conclusion based on preliminary findings of an experiment originally designed for another purpose, the investigators say that thet have already reproduced the pholesterol-lowering effect in adult Americans who are consuming large amounts of homemade voguri as part of a continuing study at Vanderbilt University of Tennessee.

High in Cholesterol

The effect is occurring even though the yogura diet as high in choiesterol. Yogurt, like Iresh milk, is a relatively highcholesteroi lood. Il made from whole milk, a quari contains from 120 to 150 milligrams of the latty substance notorious for its ability to clog arteries.

The interrelationships between the amount of clinlesterol in the diet, the amount the body itself produces and the level of cholesterot in the blood are poorly understood However, it is widely believed that excessive dietary cholesterol while shutting off the body's production to some extent, generally results in an excess in the blood and etentual clogging of the blood yeasels.

The African study was conducted by Dr. George Maun, associate professor of bjochemistry and medicine at Vanderbili who is an investigator for the National Heart and Lung Institute, and Anne Spoerry of the African Medical Research Foundation, It

say originally intended to explore the effects surfactants, a widely used class of food additives, have upon blood cholesterol levels.

Surfactants make oil and water more mixable and are commonly used in this country in such cominercially produced foods as mayonnaise, ice cream, chocolate and baked goods, as well as in detergents. In earlier experi-meots in rabbits, monkeys and dogs, Dr. Mann found that blood chniesterol levels rose when surfactants were adoed to the animals' dicts in levels ordinarily used in American foods. He then went to East Africa to test this observation oo humau beings.

Masai Tribesmen Dr. Mann chose for the study

a group of Masai tribesmen, a primitive nomadic people he has studied intensively for the last decroe because they are unusually resistant to heart disease despile a milk-and-meat diel heartly laden with animal fais and cholesterol.

The regular Masai diet consists

Professorship in Rome

ROME, June 25 (IHT).-The American Academy in Rome has received a grant of \$750,000 from the Andrew Mellon Poundation to fund a professorship in classical studies, it was announced resterday.

of about a gallon a day of fermented whole milk, a kind of homemade yogurt and a once-aweek feast of meat, with a daily cholesterol intake of nearly twica that recommended by the American Heart Association.

The 24 young Masai men chosen for the study were divided into two groups, a treatment group that received surfactant in their vogurt and a control group that got yogurl without the additive. Since the food was free, the men kept asking for more and soon were consuming twice their normal amount of yogurt. Not surprisingly, they also hegan to gain weight, and since weight gain hy itself is known to raise cholesterol levels, Dr. Mann decided to end the experiment after three wecks.

The big surprise came, however, when the men's cholesterol was measured. In both the treatment and control groups, blood cholesterol icvels had dropped significantly since the start of the study. In fact, the mors weight gained and thus, presumably, the more yogurt consumed, the greater was the cholesterol drop. This drop occurred despite a tremendous increase in dielary cholesterol, an a must have resulted from a dramalic decline in the body's own production of cholesterol. Dr. Mann concluded.

Super star.

performance of Margarethe von Trotta in the central role.

"The Gravy Train," intended as a "very American" action movie, comes off as an "awful warning to the young men of America," says Nora Sayre. It focuses on brothers. West Virginjan coal miners Stacy Keach and Frederic Forrest), who quit their jobs to make a fortune as robbers. "They're soon betrayed by their fellow hoods, and the battles within the small gang become the bulk of the picture." Sayre says. "Throughout, there's too much moralizing about materialism: .It's obvious that the greedy brothers are going to be punished for pursing that grayy train, and much of the script seems like a recipe for retribu-

"The Parallax View" is a suspense melodrama which, says Vincent Canby, "travels a borizontal course from beginning to Neither director Alan J. end." Pakula nor his screenwriters. David Giler and Lorenzo Semple ir., display the wit that Alfred Hitchcock might have used to give the tale importance transcending immediate plausibility, says Camby. "Without giving away the plot, the idea, simply staled, is that there is somewhere in this country a giant corporation the Farallax Corp. dedicated to training and putting out for hire misfits and malcon tents who have been elevated to professional assassins." Wairen Beatty plays a reporter investigating a political assassina-Hon conspiracy, Paula Prentiss 3. TV news reporter and Hume Cronyn is a harassed city editor.

"The Terminal Man," a thriller written, directed and produced by Mike Hodges, features the cops-sorry school of medicine but no suspense. Iu the movie, based on Michael Crichton's novel, the psychosurgery intended to make

hrain-damaged George Segal less violent only serves to make him more so, says Nora Sayre, "With a headful of wires and a tiny computer planted in his neck, he runs amok on the conviction that machines are taking over the world. The picture moves as slowly as a glacier - an image that's reinforced by the repetitive shots of long, while hospital corridors, white bathrooms and home decor-in fact. It's a whiteon-white movie. There's no sus-pense; the only frightening moments occur when you fear it may last forever, especially during the seemingly endless operation and an interminable manhunt." Joan Mackett and Richard A. Dysart also take part.

award at Cannes in 1972, opened recently in New York. Nora Sayre found it "one of the hest films of this season." Weremuller excels in conveying dilemmas, says Sayre. Set in Sicily "The Seduction of Mimi" made before "Love and Anarchy": concerns a "young labore" who lurches between the local Matia and the Communistswheo all he really wants is a personal life. Mimi refuses to vote for the Mafia's candidate in his town's elections, hence he loses his job. He believes in the rights of working people, yet he makes a half-baked Communist because he's eager to earn well. 10 provide for his child, Meanwhile. he shuns the wite who displeases ium in hed and falls violently in love elsewhere. He thinks of hunself as a "civilized man," But when his neglected wife cuckolos him, all his energies surge into pioliting vengeauce against her lover-an obsession that has norrendous consequences for Mimi and puts him again at the mercy

"The Seduction of Mimi." a "furious farce" that won Luia Wertmuller the best - director sexual hypocrisies and political of the Mafia."

BUSINESS OPPORTUNITIES

metropolitan medical center has been vividly captured on celluloid and edited into an absorbing hour and a half. There are views of the reception rooms, the wards, the operation theaters and the problems of the patients and the physicians are intelligently presented. A cardiac case is rushed for treatment; an alcholic is sobered up: an in-patient, reluctant to depart, is urged on his way; a lost child who has fallen out of a window receives medication and temporary shelter: a psychiatrist beseeches a welfare official over the telephone to provide relief funds to a schizophrenic. There is more authentic drama here than you will find in a hundred movies and Wiseman's account lends it a pulsating urgency.

Of the exceedingly fine film "Les Oiseaux, les Orphelins et les Fous" (now at the Pagode) I have written before-when its release was being held up in backlog. A Franco-Czecb production, directed by Juraj Jakuhisko, it is a surrealistic fantasy depicting the mad despair of a band of social oulcasts, defiant nonconformists and victims of a changed order. Their hobo existence becomes a wild anarchistic spree, rich in black humor, despite its grim essentials. It is good news that it has at last achieved French re-

"The Deadly Trackers" (a) the Ermnage in English: is quite a ghazily Western, sickeningly sentimental and dull. Its lugubrious solemnity excites audience giggles. It presents Richard Harris as the do-good sheriff of a Southwestern town at the mercy of badmen. The sheriff is opposed to all violence and the use of firearms

Chinese Jar Brings \$554,400 at Sale

LONDON. June 25 AF: -A 14th-century Chinese Mei Ping jar waa sold yesterday for \$554,400. It was the second highest price ever paid at Ruction for a work of art other than painting, Christie's auction house said.

The octagonal jar, 17 mehes high and decorated in blue and white, was sold by New York stockbroker Frederick Mayer who is disposine of his collection of Chinese art. It was bought by the Japanese dealer Matsuoka Christle's said that the auction

secord for art work other than painting was set earlier this year when a Chinese Ming bortle went for \$1,048,000.

FINANCIAL NEWS AND NOTES

rentification de alle and the second of the second of

Goodyear Patents Clean-Burning Fuel Two Goodyear Tire & Rubber Co. scientists have developed an automobile fuel using gasoline, alcohol and water that, they claim, may make energy-consuming, pollution-control devices unnecessary. The patented mixtura consists of 72 percent gasoline, 25 percent T-butyl alcohol and 3 percent water. Kenneth Frech and James Tazuma, who developed the mixture, say the fuel provides a high octane rating without adtiel provides a high octane rating without addition of lead while making a 65 percent reduction in specific pollutants when burned in a standard V-8 engine without pollution-centrol devices. Because it burns cleaner than usual gasoline, it also reduces engine deposits, extending engine life, they add. The fuel could be readily produced at about the sama cost as fuels currently being pumped. They say that the fuel requires additional development and evaluation, but that their research to date is evaluation, but that their research to date is "extremely encouraging."

Philips' Sees Higher Profit

Net profits of N.V. Philips', the multinational electrical and electronics company, will rise "somewhat higher" this year than the 10 percent increase the company predicted last month, according to J.W.G. Offergelt, a member of the managing board. "I have the feeling" that sales in Dutch guilders are going to rise higher than the 10 percent previously forecast, and "notwithstanding the big inflation, wa will realize the same profitability as a percentage of sales as last year 4.2 percent, he says. Denying that he was being pessimistic in failing to predict a higher profit increase this year after the 30 percent rise in the first quarter. he notes that the guilder has risen strongly against other currencies, notably the dollar, since the beginning of the year, tending to shrink revenues and profits earned outside the Netherlands when translated into guilders. But

he says that demand for Philips' consumer products, accounting for "about 60 percent of sales," is "still high. And for the future, we are very optimistic in this sector." The company is "happy" with its collaboration on computers in Unidata, tha triple alliance of Philips', Slemens and Cle. Internationale pour l'Informatique but, he adds, melding three different companies into a single organization is "a long, slow process." There will be no profit in computers for Philips' this year or next, but the company is charging all its computer development costs off as expenses and looks forward to an eventual return, he says.

GM Sees Slow Auto-Sales Recovery

General Motors sees a long, slow road back for new-car sales from this year's depressed levels and also expects the small-car market to grow less dramatically in the next few years than some analysts and its Detroit rivals have projected. But top GM executives, talking to Wall Street auto analysts, made it clear GM plans to compete strongly for a share of the smallcar market and also expects to make a profit while doing so. The officials avoided any specific forecast of new-car sales for 1975 but told the meeting it would be three years or 1977, before industry sales got back to 1973's record levels. Small cars "will be a significant portion of the husiness" in the future, they said. But since April, after the oil embargo had ended, they have taken only about 47 percent of the total U.S. auto market, com-pared with a 52 percent share in January at the peak of the gasoline crisis. "Some say they see 50 to 60 percent small cars," in the near future. "but we see the possibility of it swinging either way." one official said. A key factor is the expected improvements in the fuel economy of bigger cars, which would blunt one of the big selling points of small cars,

False Valuations Found on Contracts

U.S. Probing Operations of Sindona Aide

NEW YORK, June 25 (AP-DJ). -U.S. authorities are investigating the possibility that a close associate of Michele Sindona, the Italian financier, may have been involved in foreign exchange maneuverings that cost Franklin National Bank more than \$45 million in the first five months of this year

According to sources, federal examiners have found a number of foreign exchange contracts, bearing false valuations, involving Carlo Bordoni, a Milan banker, who was brought in as a director of Franklin National's parent holding company by Mr.

Franklin officials declined to comment on the report. They did confirm, however, that they had been advised that Mr. Bordoni is tendering his resignation, No reason was given. Mr. Bordoni until

managing director of Banca Unione, a Milan bank controlled by Mr. Sindona. That bank has since been merged with Milan's Banca Privata Finanziaria, also controlled by Mr. Sindons, to form Banca Privata Italiana. A few months ago, Mr. Bordoni was named managing director of Generale Immobiliare of Rome, a real estate and finance company

33 percent-owned by Mr. Sindons. Mr. Sindona owns about 21.6 percent of Franklin New York Corp., parent of the troubled Franklin National, and has agreed to underwrite two rights offerings, totaling \$50 million, to inject new capital into the con-

The U.S. Comptroller of the transactions which resulted in Currency's nffice, it is understood. urged the dismissal of Mr. Bordoni as a director, presumably because of his possible involvement in the questionable foreign-exchange trading activities by Franklin.

Federal authorities, it was learned, are investigating how many of the foreign-exchange contracts in question, totaling about \$450 million, were placed at fictitious prices favorable to Franklin with banks associated with Mr. Bordoni, Some of these foreign-exchange transactions, it is understood, involved Banca Unione of Milan and a Swiss bank where Mr. Borooni was an

Later today, Mr. Bordoni denied reports that his resignation was requested by the board. He also denied he was in any way involved in the foreign currency

substantial losses to Franklin. According to one federal au-thority, the Franklin foreign-exchange cootracts, it appears, were written with the securities involved valoed et fictitious prices, rather than at their actual market prices. This had the ef-tect of enhancing Franklin National Bank's earnings at a time when it was actually suffering severe foreign-exchange trading

Federal authorities are questioning officials of Franklin's foreign-exchange trading department and the bank's audit de-partment to investigate the situation. Mr. Bordoni himself, it is understood, has not been questioned by federal officials, who only yesterday morning re-ceived information that would involve Mr. Bordoni in the allegphony contract arrangement.

Bundesbank Seeks Data on Banks' Foreign Exchange Futures Trade

FRANKFURT, Jime 25 (AP-DJ) .- The Bundesbank has moved to reduce the risks in foreign exchange futures trading by ordering about 350 West German banking institutions to register their foreign exchange futures positions with the central bank, a Bundesbank spokesman said today. He said compulsory registration of futures positions will take effect at the end of July.

Through this move, the Bundesbank intends to provide itself with information about the volume and the difference between delivery and buying obligations in foreign exchange futures dealings at the nation's banks, market sources said.

Moves in this direction had been expected in foreign exchange circles for some time and came as no great surprise, foreign exchange dealers said. They added, however, that market circles were concerned over the possibility that this may not be the last step taken by the Bundesbank to control foreign exchange activities.

Sizable foreign exchange losses have already been reported Westdeutsche Landesbank Gironzentrale, Union Bank of Switzerland and Franklin National Eank of New York.

Canadian's View of Inflation **Causes Stir at Conference**

By Ian Gummer

MILAN, June 25 (IHT).—A ration to urge a return to that Canadian professor caused a stir system, he indicated. The floating at an international monetary conference here today by claiming that floating currency exchange rates represent a breakdown of the world monetary system and warning that without a return to fixed rates the West faces "ultimately a breakdown in civili-

The argument of Prof. Robert Mundell, of Waterico University, was quickly controversed by three nther experts attending the conference on inflation and monetary policy organized by Banca Commerciale Italiana.

Prof. Mundell said that floating exchange rates is the present stage of a breakdown in monetary discipline that began when the United States hroke the link between the dollar and gold in 1971. Furthermore, he said that float is one of the causes of grave international inflation, and only a return to fixed rates could avent disaster. Yet another cause of inflation, he said, is currency devaluation.

The professor was one of the billed speakers at the second session of the conference today. His view sufficiently exercised Prof. Allan Meltzer of Carnegia Mellon University in Pittsburgh that he requested the right to speak at the end of the session to deliver a ringing refutation. All monetary experts, Prof. Melizer said, are agreed that the fixed rate system has been tried and found wanting. It is an abersystem brings stable prices if used in conjunction with domestic dis-

ciplinary measures, he said.

As for the devaluation theory, he said that higher U.S. prices were brought about by the growth in the money supply, not by the devaluations of the dollar.

His view on the currency exchange system was shared by a Dutch economic expert and by Gottfried Haherler, the now retired Harvard economics pro-

The latter said that contrary to Prof. Mundell's view, fixed exchange rates are a cause of in-flation while the floating system minimizes it. And how, Prof. Haberler asked, can the fixed system work when the level of inflation in various countries varies? Under that system conilibrium could only be achieved by either continual exchange rate adjustments or an ever higher rate of inflation in countries with 2 surplus payments balance.

Experts Divided

PARIS, June 25 (Reuters).-International economic experts today failed to reach agreement on how best to fight inflation while avoiding the risk of a recession, informed sources said. This followed two days of discussions here by the economic policy committee of the 24-nation Organization for Economic

Coperation and Development.

2 Europeaus Seek a Stake In U.S. Bank

Warburg-Paribas Eye Link With A.G. Becker

By Carl Gewirtz

PARIS, June 25 (IHT).-Warburg-Paribas Inc., the New York investment banking firm jointly owned by Europe's leading private bankers, plans to merge with A.G. Becker & Co. of Chicago.

Becker is considered a wellestablished, wealthy and successful financial services company which is expected to give the European group an important "grass roots" entree to major U.S. corporations.

Details of the link-up are yet to be spelled out. Bowever, the bankers envision creating a new firm comprising Becker and Warburg-Paribas, capitalized at some \$50 million. Warburg-Paribas Inc. already has a paid-up copital of \$10 million and the European partners will add up to an additional \$15 million in order to be-come equal partners with Becker in the new firm,

However, Becker is a member of the New York Stock Exchange, which at present restricts the access of foreigners to its trading floor. Thus, it is expected that the Europeans will be held to a minority participation and the size of this holding is now being discussed with officials of the Big Board, which is expected to make its views known by mid-

A spokesman for the Banque de Paris et des Pays-Bas, which, along with S.G. Warburg of London, owns Warburg-Paribas, In-dicated today that access to the NYSE trading floor "Is not an important consideration" in the link. Rather, he said, the European group is looking to de-velop its corporate finance activitles with U.S. firms and at the same time would like to draw on Becker's capacity for privately placing securities among large institutional layestors.

Ever since Washington removed its controls inhibiting the sale of foreign securities within the United States earlier this year. European firms as well os government agencies have tried to top the capital resources of the U.S. market. The success to date. however, has been rather limited, In any event, the European etforts to market their debt offerings there were led by the major

the European banks out of the commissions. Today's move, if approved, should enable the two European banks to win some of this business -and the commissions-for themselves.

In return, Becker would profit from winning the business of European clients that might otherwise have gone to the big New York banks.

U.S. Trade Deficit a Near Record By Edwin L. Dale Jr. Poor Farm Sales WASHINGTON, June 25 Hurt May's Total NYT) .- A decline, possibly tem-

porary, in agricultural exports together with a continued growth in imports swuog the U.S. balance of trade into near-record deficit in May, the Commerce Depart-

ment reported today. The excess of imports over exports was \$777 million, which contrasted with an export surplus of \$93 million in April. The May deficit was the largest since the record deficit of \$815 million in October 1971.

In contrast to most recent months, the rise in the value of imports from April to May was not attributable to oil. Although imports of petroleum and petroleum products last month cost almost four times as much as in May a year ago, there was no increase from April to May this

The trane because has moved erratically so far this year, but for the first five months as a whole there was an almost exact balance. Emports in that period, incusured in dollar terms at an control rate, were ronning 30 percent above the record \$70.8 bitlion of 1973 as a chole, and ini-Posts were 33 percent higher than the 1973 total of 369.1 bil-

Taking the five quoths as a whole, oil imports accounted for about \$6.4 billion of the total rise in tile value of imports of \$11.1

The volume of oil imports last month was almost exactly the same as in the same month a year ago, but the dollar cost was almost four times as high. With imports valued to include

scheduled public offerings. International Telephone Telegraph postpooed to mid July lts \$150-million, 25-year debeu-tures offering that had been

slated for temorrow. And Hooeywell Finance Co. set

the week of July 8 as the date for its \$75-million offering of 25-year bends which had been scheduled for sale on Thursday.

Bahama Cracks Down on Vesco Interests

NEW YORK, June 25 (AP- ventures cootrolled by him or his group retained a Nassau lawyer to appeal the government's action. DJ:.—The Bahamian government ins begun a crackdown against funitive financier Robert Vesco by closing down the Vesco-controlled Bahamas Commonwealth Bank (BCB) of Nassau.

BCB has been described by the Securitles and Exchange Commission as a conduit used by Mr. Vesco to transfer money from mutual funds managed by IOS questionable business

current year would be lower than that of 1973, but above the level

Credit Lines Total \$1 Billion

Du Pont Debt Plan Is a First

TOKYO, June 25 (AP-DJ) .- Du Pont's rate of profitability in the

In revoking BCB's license, the government charged the bank

was operating "in a manner detrimental" to the interests of its customers and other creditors. The closing follows submission to the government last May 29 of a 160-page report about the bank's affairs by the New York-

Marwick spokesman said Bahamian law forbids public disclosure of the report's contents. The government did not say would shortly ask the Supreme the bank

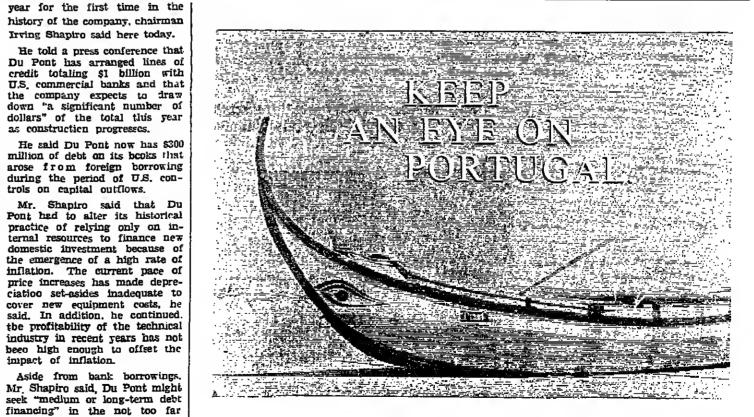

Meantime, there were unconfirmed reports that the Vesco

It is estimated that \$250 million went through BCB from March through November 1971 This was money that public stockholders around the world had invested in four IOS funds —Fund of Funds, Venture Fund. Transglobal Growth Fund and

It is not known how much money remains in ECB. The four funds are in liquidation, and the liquidators are currently endeavoring to recover the huge sums that Mr. Vesco allegedly drained from the funds.

Securities Chief Dies

TOKYO, June 25 (AP-DJ).--Yuklo Abe, board chairman of Daiwa Securitles Co., died yesterday of a cerebral hemorrhage. He was 73.

We are your gate to golden business.

are being freed for the new model. The Golf is withly a the successor of Voltage

SWEDEN'S LARGEST BANK. PKBANKEN.

On 1st of July 1974 Postbanken and Sveriges Kreditbank will merge.

The full name of the new commercial bank is Post- och Kreditbanken-but it will be commonly known as the PK-

Like its predecessors Postbanken and Sveriges Kreditbank, the new bank is government-owned.

Assets of about 7.7 billion US3 make Pikbanken the largest bank in Scandinavia.

The new PKbanken will have a de-centralized organization, which facilitates close contact with the business world. An extensive and well placed branch network in Sweden will guarantee a high level of service.

This makes the new PK banken a force to be reckoned with when it comes to banking contacts in Sweden. We have both the will and the resources.

IT'S A QUADROOPLIT-

BOOKS

TINKER, TAILOR, SOLDIER, SPY By John Le Carre. Knopt. 355 pp. \$735.

Reviewed by Anatole Broyard

Carre's new novel with the feeling that spying-which once was a practical matter of selfdefense and elementary precaution—has gotten out of hand until it is now autonomous and paranoid. Instead of increasing national security, his spies appear to gamble with it in a contest of vanities. No compulsive neurotic ever evolved so many rituals as they do, Pomp and circumstance have degenerated into spiralings of subterfuge. The urge to engage in conspiracy seems as intense as certain forms of sexual perversion.

In an age wheo alienation is a catchword. Le Carre's characters are champions. They are insulated from immediacy, from normal human contact, by every means that ingenuity can devise. Because suspicion is their profession, they cannot even love in peace. How many loves can bear such intense scrutiny, can solace such hungry hearts? Take George Smiley, the hero of "Tinker. Tailor, Soldier, Spy." He is a moral man, but his morality is as exhausted as a woman who has had a dozen miscarriages. In keeping it afloat, he is like a shipwrecked man struggling mightily to pull to shore a fellow who is already drowned .

Just repressing their despair must be a Herculean task for the characters in this book. I don't see how they have energy left foranything else. Only the tension of their jobs-much of it artificially induced-keeps them functioning, the way coffee does. They are persuaded, against their better judgment, that the drama of survival depends on them. It is up to them, they believe, whether our national destinies are to be tragic, comic or burlesque. When one of them reaches a point of disillusionment where he can't see why comedy should be preferable to tragedy, he becomes a traitor and burlesques the country of his birth.

Their world is Kafkaesque without the metaphysical grandeur of Kafka's, Jamesian in its convolutions without the values those coovolutions were evolved to express. In Le Carre's world, we have all the techniques of horror without the goose-pimpling thrill of it, all the exigencies of honor without the pride of it. No sociologist, with his sheaves of documented apocalypses, has succeeded so well in dramatizing the temporary politics. If, as one of the characters in the book remarks, the secret services of a nation are the expression of its

CAME away from John Le subconscious, then it is ne work so many of us cannot, or de not, fall asleep at night

Someone in the circle, the telligence center of England is double agent, a man whose o ward life is a lie, acted out the service of his country. 1 very conception is staggering: man spending 10 or even 30 Je not only dissembling before thest friends but betraying the as well-and all for an ides What a metaphor for decaden What an inspiration for t cynical.

It is such a pleasure—and r such a common one, either see a talented writer doing wh he does hest. So many co temporary authors seem dete mined to go against the grain their sensibilities, their e perience, their natural leaning I could name two of our bea known novelists who have do. precisely this in their rece books. Le Carré did, too, after promising beginning in "T Spy Who Came in From t. Cold," Especially in "A Sm: Town in Germany," he abando: ed his discipline of style as structure to write what seemed me a murky homily or dithyran on love.

In "Tinker, Tailor, Soldie Spy," he is again writing abou love, but in a frugal or cubist structure that favorably con pares to the form of almost ar "serious" novel I can think c. Love for a woman, for a frien for a standard of behavior, fo one's own integrity, for simp truth-this is what the book about, This and the difficulty supporting such a love. The spy only an exacerbated image ourselves, forever condemned to be the double agents of our ow humanity. Smiley is only one of severe

line characters, Guillam, wb feels "not merely betrayed bu orphaned" by the fall from grac. of his hero; the betrayer, wh needed the symmetry of a historical and economic solution and who substituted internationa theatr.'s for the simple affection he never learned to feel; Con rol the secret behind the secret, the "Mr. Head" of the Intelligence Service, who might well have complained, like Paul Valery character, of syllogisms debases by agony." And Prideaux. straightforward old English pro totype, who can't find any firm ground in this century; or Tarr. : seeing his dishonesty dwarfed by that of his "betters," or Camilla who refuses to "decode" hersel simply to relieve her lover's anx-

I don't think that anyone in likely to write a better suspens novel than this one. And it is prob ably unfair to restrict it alto: gether to that category, becaus this book is not about the good guys against the bad guys, bu about most of us against our selves. As Max Lerner once re marked, "ideas are weapons." An in this respect, too many of the can be described as "armed and dangerous."

Anatole Broyard is a New Yor Times book reviewer.

BRIDGE

the play and defense problems: are routine. A player of average experience or better can get satisfactory results by drawing on his experience. Relatively rarely cause the defense will establi a major suit before the declar can get a club stek. So christe will probably fail to solve it. Books that test the reader's cardplay in such situations have always been popular. The newest in an excellent English series is "Bridge Hands for the Con-noisseur" by Eric Milnes and Paul Lukacs, published by Barclay Bridge Supplies. The book includes 58 well-presented deals in its 127 pages and allows the reader to make up his mind about the right line of play before turning the page to inspect the complete deal and analysis. The diagramed deal from the

On the great majority of deals,

book is a neat example of turning a hear-certainty into a certainty. It can safely be said that in practical play hardly any declarers would make the right play but the fates would probably decree that their misplay would go unpunished.
There would be nothing wrong.

with an opening bid of one diamond on the South hand shown, but most tournament -players would open two no-trump. Twenty-one points is the normal minimum, but the fifth diamond compensates for the lack of a

A heart lead would defeat the contract, but West naturally chooses a spade. With the East-West cards covered, decide how you would play as South after winning the first trick. Clearly you have five tricks and no more in the major suits, and must make at least four in the minor.

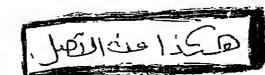

Three tricks are the limit diamonds, so South must at for three dismonds and one city or four clubs. Playing diamon at once is clearly hopeless, h

The obvious play is a club the obvious play is a came the queen and if this wins e erything is easy. South can be diamonds to make sure of ni tricks. But this play will fatal if East has all four clu as he has in the diagram will win and play a major sur either suit—and the defense a

West Germany Still Favored

LONDON, June 25 (UPI). William Hill bookmakers have listed the following odds on the last eight teams in the World Soccer cup: --

West Germany 5-2; The Netherlands 7-2; Poland and Yugoslavia 7-1; Brazil 8-1; Argentina 9-1; East Germany 10-1 and Sweden 20-1.

Monchengladbach coach, Hennes Weisweiler, deploring the fact that West Germany has been playing without them.

Yet is this fair? Is this truly what has been wrong with the West German team? And would the insertion of Herbert Wimmer on one wing and Dieter Herzog on the other really transform the ineffective team we watched lose to East Germany in Hamburg last Saturday?

I am not at all convinced, partly hecause that team had two players perfectly capable of going down the flanks and crossing the ball.

Bayern's blond Uli Hoeness was. after all, originally a right wingar, and still likes to drift out there from the middle to do damage. Paul Breitner, of the same club, spent practically tha whole game overlapping danger-ously from left back. And while is true to say that Jürgen Grabowski, used at outside right against the DDR, had a poor game and plays for his own club midfield, it was as a winger that he made his name. It was as a right winger that he came on four years ago as substitute in the World Cup quarterfinal in Leon, Mexico, and destroyed an English defense in which left back Terry Cooper was exhaust-ed. Had Ramsey had the basic sense to replace Cooper, it might have been another tale. But there Wa are

Poland's dynamic wingers should be capable of winning tha match against Sweden, which played its defense so skillfully and strongly against the Dutch, but will probably be stretched by the Poles. Grzegorz Lato and Robert Gadocha are a spiendid pair. fast, tough skillful hrave and a fine shot. It is rather ironic to think that Late, who set up Poland's vital goal last October against England at Wembley to qualify for the finals, would probably not have played had the famous center-forward Lubanski not been injured. But putting Late on the right flank (he is just as dangerous on the left) gave the attack balance. Sweden,

EXHICS AWESTANDAY

by contrast, tends rather to play through the middle. It has no such wingers as Kurt Hamrin and Skoghund, the clever little men who did so much to get them to the World Cup final of

Talking of clever little men, Scotland may well have paid the penalty for not making use of Celtic outside right, the very antithesis of a team player, but a footballer of immense skill and unorthodoxy. Had he been brought on in the closing stages of the game against a tired Brazil, he might have turned the good policy to put him on at half-time against the Yugoslavs. Scotland was a good, compact, aliround side, but at this level that is not enough. To score goals against a World Cup defense, you essentially need flair.

Wingers, of course, can't do much without the ball, and that is why I don't really fancy Argentina's chances against the Netherlands. Carlos Babington is the man who makes bullets for Houseman to fire, and he has heen euspended for the match. How he must regret his idiocy in twice deliberately handling the ball in the match against Italy! The first time he got away with it. the second he was shown the

And Krol added: "I think Argentina is a very different team now, in better form and better condition: I think they will be difficult to play. But if you lose the first game it's very hard. You must win it or draw it, else your morale goes down,"

Haitian Banned 1 Year

ters).-The International Football committee announced yesterday that Hairl's Ernst Jean-Joseph found guilty of taking a hanned drug in a World Cup game against Italy, has been banned from all international soccer for one year. FIPA, which originally banned Jean-Joseph only from further participation in this year's finals, also said that in any future cases of doping, the punishment would fall on the national association as well as on

FRANKFURT, June 25 (Reu-Federation's disciplinary the player.

FALLING FLAT-Dutch girl Marijke Schaar hits the grass at Wimbledon while losing to Evonne Goolagong.

King, Rosewall Experience Wimbledon Victories

Billie Jean King, the top women's seed, and Ken Rosewall of Australia showed that there is no substitute for age and experience at the Wimbledon tennis championships when they marched impressively onwards in the singles today. It was the second straight day of play without s major upset.

King, favorite lo win the singles title for a sixth time, routed her 18-year-old fellow-American Kathy May, 6-1, 6-1, whila Rosewall, who is celebrating the 20th anniversary of his first ap-pearance in the final here, beat India's Vijey Amritraj, 6-2, 5-7, 9-8, 8-1.

At few other courts is experience as important as it is at Wimbledon, where massive crowds will defy hleak weather, as they did today, to give the championships a very special atmosphere and where the devastatingly fast grass courts put a high premium

In their matches, both King. 30, and the ninth-seeded Rosewall, 39, used their experience to tha

King's victory, which took just 30 minutes, helped end specula-tion that too much indoor tennis might have upset her chance of retaining the title. Her secondround match was more a parade of her skills than a contest and poor Miss May, overawed and overpowered, could offer no more than minimum resistance. In the second set she won only 12 points.

Like men's top seed John Newcombe yesterday. King had to

having competed almost exrlusively on artificial surfaces this year-while playing World Team Tennis in North America. But neither the fast grass nor the cheerless weather disconcerned

All the other seeded women in action today-Evonne Goolagong. Rosie Casals, Virginia Wade and Kerry Melville-won their firstround matches although Melville of Australia, seeded sixth, was given hard work by Dutch girl Betty Stove before winning, 4-6, of Britain, 6-4, 6-4.

Goolagong, the 1971 champion and third seed, needed only 29 minutes to crush another Dutch girl. Marijke Schaar, 6-1. 6-1. while Casals beat Britain's Penny Mcor, 6-2, 6-1, Wade defeated Veronica Burton of Britain without dropping a game.

Rosewall's second-round maich against Amritraj, rated the most dangerous unseeded player in the tournament was shaping like a classic until the fourth set when the Indian's game collapsed against the persistent quality of his opponent.

Perhaps it was losing the vital third-set tie-breaker, 7 points to 3, that broke Amritraj's spirit for certainly after that he looked very ordinary. He had two break points in the first game of the fourth set but squandered them and then dropped his own service in the fourth and sixth gemes to go out of the championship.

Braves 4, Dodgers 3

At Los Angeles, Ivan Murrell robbed Jimmy Wynn of a three-run homer with a spectacular catch in the third inning and Atlanta came from behind to nip the Dodgers, 4-3, on Buzz Capra's aulcide squeeze hunt in the seventh inning. After Murrell

Tuesday

Mets Defeat Cubs

CHICAGO, June 25 (UPI).-Ed Kranepool's first home run of the season, a three-run shot. insured Jerry Koosman's third straight victory as the New York Mets beat the Chicago Cubs, 5-1, today.

fell into the left-field stands at Dodger Stadium to catch Wynn's long drive that would have given Los Angeles a 6-0 lead, Capra settled down and retired 16 Dodgers in a row before Davcy Lopes singled with one out in the eighth.

Padres 2, Giants 1

At San Diego, reliever Vicenta Romo stranded the tying on third hase to check a San Francisco threat in the ninth inning as the Padres scored a 2-1 victory.

Astros 6, Reds 1 At Houston, Doug Rader and Cesar Cedeno blasted home runs to hack the five-hit pitching of Tom Griffin and lead the Astros to a 6-1 victory over Cincinnati.

Observer Some Disagreements

By Russell Baker

writing a regular newspaper column is the discovery of the rich variety of dissent which still thrives in the United States. Every week the mail brings refreshing evidence that Americans remain a wonderfully disputations race eager to catch out the ar-

rogant columnist in his foolishness and torment him with demands for public confession of his poor judgment. Diuddled thought, careless cruelties, subverzive opinion, bad grammar, weak history aod general ignorance.
As a tribute to

Baker

all who try to keep us honest in this business this space is devot-ed today to the dissenters and their dissents. The most vigorous of these right now, of course, are the people who believe President Nixon is a great man who is being destroyed by newspapers and television.

They usually write in rage and at length. They conteod, with only minor variations, that columns unfavorable to the President are animated by personal vindictiveness, mental iliness, blas toward the Democratic party, ideological zealotry and a desire to see Communism triumphant in the United States. Occasionally, a more tolerant dissenter concedes that they result from merc stupidity.

Present political passions, however, rarely produce the kind of dissent that reveals the wide range of interest which occupies the American mind.

A New England gentleman, offended by a patronizing remark about Calvin Coolidge, protests that Coolidge was in fact an intelligent and witty man of coosiderable substance and deplores the column's perpetuating the no-tion of "Silent Cal" as a national joke. He wants to see a full column that would finally do justice to Coolidge's excellence.

Numerous persons have written in anger, contempt or pity about this column's frequent allusions to the difficulty of reading Mar-

cel Proust. They want it known that

WASHINGTON.—One reward of Proust is a great writer, so let it be said. Proust is a geat writer. Coolidge wasn't so bad either. A student of Latin points out that the columnist must be dumb about Latin grammar, which is proven by his writing "Omnia Gallia" instead of the correct 'Omnis Gallia."

The greatest volume of dissent ever produced by a single column in this space dealt not with Watergate or Vietnam, but with coffee grounds. The column merely noted that there was absolutely no agreement in America about whether it was better to dispose of coffee grounds by putting them down the sink or in the garbage.

For months afterward, bales of letters arrived pointing out that peither was the best way of getting rid of coffee grounds; the best thing to do with them, every letter agreed, was to use them

for garden mulch. It is impossible to mention anyone's home town in print without offending almost every letter writer who lives there

Thus, let it be said that in the opinion of various dissenters the finest city in the world is Buffalo; Chicago; St. Louis; Rahway. N.J.; Baltimore; Birmingham; Miami Beach; Buzzard's Bay. Mass, and several dozen others whose credentials are lost in the letter files here.

Several people object to making

fun of Santa Claus in print. Dozens believe the column has done a vast disservice to the nation by showing insufficient respect for mothers on this past Mother's Day and for fathers on Father's Day five or six years ago. Numerous militant women would like the general readership warned that the columnist is a sexist swine and a plumber in Atlanta would like to damage the columnist's nose for suggesting in print that American plumbing is too backward to keep bathtub water from leaking through the

living-room ceiling. The day after tomorrow a letter will arrive stating that this column is an imbecilic waste of valuable newsprint that could have been better used to expound the excellence of Marcel Proust, Henry Klssinger, off-track betting, transcendental meditation, youthful ideals or soybeans.

Tightening Security at London Airport

By Fred Coleman

I ONDON (AP).—Scotland Yard is taking over security at London's Heathrow Airport, long dobbed "thieves row" by the British press. The police should take up their posts

Policing has been a problem. More than 21 million passengers and \$8.4 billion worth of freight pass through Heathrow each year. Some 30,000 cars use the airport every day. To guard all this, Heathrow employs a private police force of 400 unarmed men. Normally they are backed up only by a squad of 20 men from Scotland Yard, the London police force, but the Yard sends in reinforcements during terrorist or skyjacking

Stories of the lax security at Heathrow are legion. Ias year a thief, dressed as an airport worker, thumbed a ride on an airport cargo truck, pulled a gun on the driver and escaped with a diamond consignment from South Africa valued at

Bill in Parliament

A pilots' pressure group, testing airport security, sent a man through restricted sones with a false identity card. The card carried a photo of his basset bound's face and the name "Fred Basset." The man was not stopped.

Although officials deny that security at the airport has been lax, important changes are on the way. A bill now going through Parliament, and almost certain to pass, will let Scotland Yard take over the security job. This will give the airport force the full resources of the 20,000-man London police force to lean on. Parliament action is needed because the airport

is private property.

Officials believe, however, that the bill is unlikely to win final approval before the fall, leaving the present private police force in charge through the summer tourist season. British newspaper investigations claim Heathrow loses \$10

million to \$35 million a year from theft, mostly from pilierage of cargo in transit. Looting of passenger baggage is relatively small. The British Airport Authority, which runs Heathrow, calls the press estimates "wildly eraggerated." A BAA spokesman said theft loss at Heathrow last year totaled the equivalent of \$2,591,443.

Management and Unions

Both management and unions have played a role in Heathrow's security problems. Airline managements keep a close eye on security costs. Unions resent inspections by airport police watching workers suspected of stealing from cargo sacks. Since both the police and the airport workers are employed by the same airport authority, officials running the airport often have to choose between tighter security and the cost of an airport strike. Security watches have been relaxed under union pressure, some airport officials say.

An investigation by the Daily Mali newspaper last year

claimed that airport security was "virtually nil," despite threats from Irish terrorists. On May 30, s bomb exploded at a Heathrow parking lot, injuring one man and damaging 50 cars.

Other Airports

At Only Airport in Paris, more than 700 armed police stand guard. In Brussels there are 500 airport police with automatic weapons. At Heathrow the unarmed police don't even have westoms. The BAA opposes arming police and risking airport shootouts. "Wa don't want them strutting around like sheriffs," a BAA spokesman said. When potential trouble came in January, the British government sent in the army-200 soldiers, tanks and automatic weapons—to deal with a terrorist threat that lasted several weeks. In the end, the alert passed without incident and the troops withdrew. But airport officials say cargo thefts continued while the army was there.

Snoring: A Habit That Affects 35 Million Americans

REAL ESTATE TO LET,

SHARE

By Judy Klemesrud

NEW YORK (NYT) .-- NGCAW. O-O-O-O. NGCAWWWWW-WW-M M M WHE-O-O-O-O. Those are the sounds of snoring, a habit that affects 35 million Americans and has been known to cause chaos in college dormito-

ries, havoc in military barracks

and splitsville in once blissful

marriages. Dr. Marcus Boulware once had a blissful marriage, or at least he thought he did. What he didn't know was that he snored very loudly, something his wife was too polite to tell him about until it was too late. Finally,

she divorced him. "Snoring wasn't the only reason, of course," Dr. Boulware, a 66-year-old speech pathologist at Florida, A & M. University said here in an interview. 'But it certainly was one of the reasons."

Confused and burt by the experience, Dr. Boulware rushed to an ear and throat specialist for advice on how he could stop being a nocturnal nuisance. The specialist laughed, and snipped off the tip of Boulware's uvula the tip of the soft palate).

It didn't work. The trumpeting continued, and as a result, Dr. Boulware became so fascinated by what he was doing while asleep that he has spent many of his waking hours since that visit eight years ago to the doctor's office researching, thinking and writing about snoring.

The result is "Snoring" (American Faculty Press, \$6.95), a new book about the subject that is humorous and serious at the same time. Dr. Boulware doesn't pretend that he knows how to cure snoring, but he does round up the various causes and provides several suggestions that may prevent this family puisance from hecoming a catastrophe.

Despite his own experience.

Dr. Boulware agrees that "the best thing is to go to a doctor." Quoting from a paper written by Dr. Ian G. Robin, a British otolaryngologist who is one of the few doctors to do snoring research, Dr. Boulware said that a cure for snoring is possible in

Protest on Bolshoi Tour TORONTO, June 25 (AP),—About 50 persons demonstrated last night outside the theater where the Soviet Bolshoi Ballet company opened a six-night run. Their placards protested treatment of Jews in the Soviet Union Inside, hecklers shouted "What about the Jews?" as dancers Irina Kolpakova and Mikhail Varichnikov performed a 10-minute pas de deux,

SHARE

about 50 percent of the cases; that 30 percent can be helped by palliative measures; and that 20 percent seem hopelessly incurable.

Dr. Boulware, who spent five years researching his book the had a \$1,200 grant from the Carnegie Foundation), said that among the causes of snoring are: swelling of the tissues of the throat and nasal passages, obstructions and growths in the nasal passages; deviation of the septum; smoking; obesity; neu-roses; drinking; and even air pollution.

There are almost as many "cures" for snoring as there are causes, Dr. Boulware said, including dieting, dream analysis, anti-moring devices, self-hypnosis, nose and throat surgery, allergy and shous treatments, cor-rective dentistry and phonetic

WARM WELCOME-Police force a path for Groucho Marx. in beret, through crowds that gathered in New York to sec a revival of his movie "Animal Crackers." Marx, 83, said. "I'm delighted to be here although I was almost murdered."

PEOPLE:

Smokers and Nonsmokers At Doctors' Meeting

Doctors attending meetings this week of the Canadian Medical Association adopted a resolution Monday morning pledging not to smoke during the conference. But by afternoon one doctor complained that so many of his collegues were sneaking out for smokes that he couldn't concentrate. He asked fellow doctors to remove he no smoking signs but he was defeated by a 2-to-1 margin. The smoking and nonsmoking doctors then passed a formal declaration prohibiting smoking during the conference because "physicians should set examples of life styles promoting good health.

SICK LIST: Marlon Brando has been hospitalized for a tear in his throat, it was announced Monday. Officials at UCLA Medical Center would say only that Brando, 50, was admitted to the hospital last Priday and was expected to remain several more days. However, Daily Variety, a Hollywood trade newspaper, reported that Brando "almost died" in Tahiti two weeks ago after eating fish which had gone bad. His torn esophagus was caused by vomiting, Variety said, Mrs. George Meany has been released from a hospital in Tarrytown, N.Y., where she had been treated for chest pains. Mrs. Meany became ill Saturday during a party given by former N.Y. Gov. Nelson Rockefeller for Secretary of State Heary Kissinger.

Guru Maharaj Ji's Diving Light Mission is being audited by Colurado authorities to see if purchases ranging from underwes: to ao ocean-going power box were proper under the mission tax-exempt status as a religious organization. At issue, among other things, is whether the mu-sion, whose headquarters is in Denver, should have paid a 6.3 percent sales tax on its motorcycles, cars and trucks. The flect includes a Maserati, a Rolls-Royce and three Mercedes-Ben. reserved for the personal use ut the 16-year-old guru. Tax off:cials said that the exemption doc: not apply to individuals, but a spokesmao at the mission said that all residents, who live in 17 mission houses, spend all their time in religious pursuits and have no private or individual selves. Not even their underwear is their own, he said. -SAMUEL JUSTICE.
